ISO/IEC 19795-1:2006-04 (E)

Information technology - Biometric performance testing and reporting - Part 1: Principles and framework

Contents

Page

Foreword v

Introduction v

1 Scope 1

2 Conformance 1

3 Normative references 1

4 Terms and definitions 2
4.1 Biometric data 2
4.2 User interaction with a biometric system 3
4.3 Personnel involved in the evaluation 3
4.4 Types of evaluation 4
4.5 Biometric applications 5
4.6 Performance measures 5
4.7 Data presentation curves 7
4.8 Statistical terms 7

5 General biometric system 8
5.1 Conceptual diagram of general biometric system 8
5.2 Conceptual components of a general biometric system 8
5.3 Functions of general biometric system 10
5.4 Enrolment, verification & identification transactions 12
5.5 Performance measure 12

6 Planning the evaluation 14
6.1 General 14
6.3 Determine information about the system 14
6.4 Controlling factors that influence performance 15
6.5 Test subject selection 16
6.6 Test size 17
6.7 Multiple tests 18

7 Data collection 19
7.1 Avoidance of data collection errors 19
7.2 Data and details collected 20
7.3 Enrolments 20
7.4 Genuine transactions 21
7.5 Identification transactions of users enrolled in the system 22
7.6 Impostor transactions 23
7.7 Identification transactions of users not enrolled in the system 25

8 Analyses 26
8.1 General 26
8.2 Fundamental performance metrics 26
8.3 Verification system performance metrics 28
8.4 (Open-set) Identification system performance metrics 30
8.5 Closed-set identification 31
8.6 Detection error trade-off / Receiver operating characteristic curves 31

8.7 Uncertainty of estimates 32

9 Record keeping 32

10 Reporting performance results 33
10.1 Fundamental metrics 33
10.2 Verification system metrics 33
10.3 Identification system metrics 33
10.4 Closed-set identification system metrics 34
10.5 Reporting test details 34
10.6 Graphical presentation of results 35

Annex A (informative) Differences between evaluation types 38

Annex B (informative) Test size and uncertainty 39

B.1 Confidence intervals and test size assuming independent identically distributed comparisons 39
B.1.1 Rule of 3 39
B.1.2 Rule of 30 39
B.1.3 Number of comparisons to support a claimed error rate 39
B.2 Variance of performance measures as a function of test size 40
B.3 Estimates for variance of performance measures 41
B.3.1 General 41
B.3.2 Variance of observed false non-match rate 41
B.3.3 Variance of observed false match rate 43
B.4 Estimating confidence intervals 44
B.4.1 General 44
B.4.2 Bootstrap estimates of the variance and confidence intervals 44
B.4.3 Subset sampling 45

Annex C (informative) Factors influencing performance 46

C.1 General 46
C.2 List of factors 46
C.2.1 Population demographics 46
C.2.2 Application 47
C.2.3 User physiology 47
C.2.4 User behaviour 48
C.2.5 User appearance 48
C.2.6 Environmental influences 49
C.2.7 Sensor and hardware 49
C.2.8 User interface 50
C.3 Examples for reporting 50
C.3.1 Finger position 50
C.3.2 Illumination 50
C.3.3 Glasses 50
C.3.4 Dirt on platen 51
C.3.5 Weather 51

Annex D (informative) Pre-selection 52

D.1 Pre-selection algorithm performance 52

Annex E (informative) Identification performance as a function of database size 53

Annex F (informative) Algorithms for generating ROC, DET and CMC curves 54

F.1 Algorithm for ROC and DET 54
F.2 Algorithm for generating CMC 54

Bibliography 55
