ISO/IEC 10027:1990-06 (E)

Information technology; information resource dictionary system (IRDS) framework

Contents

Page

1 Scope 1

2 Normative References 1

3 Definitions 1

4 Conventions 2

5 The Structure of the IRDS Standards 3
5.1 Purpose of the IRDS Standards 3
5.2 The IRDS family of Standards 3
5.3 Support for different fields of application 5
5.4 Means of support using International Standards 5

6 IRDS Data Content 5
6.1 Data Levels 5
6.2 Concept of types and instances 5
6.3 Data Containers 5
6.4 Identification of Data Levels 6
6.5 Level Pairs 8
6.6 Role of data modelling facilities 9
6.7 Extensibility 10

7 IRDS facilities 10
7.1 Classification of IRDS facilities 10
7.2 General database management facilities 10
7.3 Facilities specific to information resource management 10

8 IRDS Interfaces 11
8.1 Positioning of Interfaces 11
8.2 IRDS Interfaces Overview 12
8.3 Description of Interfaces 12
8.4 Use of IRDS Services by Database services 14
8.5 Export and Import of IRDS Data 14
8.6 Remote IRDS Access 14
8.7 Services Provided at Interfaces 15

9 Conformance 15
