Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Requirements 3
4.1 Data elements 3
4.2 RFID air interface 3
4.3 Data protocol 3

5 General encoding rules 3
5.1 Distinguishing from other applications and encodings 3
5.2 Writing/reading direction 4
5.3 Memory area layout 4
5.4 Strings and integers 5
5.5 Writing the tag 5
5.6 Reading optimization 5
5.7 Profiling 5
5.8 Locking 6
5.9 Migration 6

6 Data elements 6

7 Data blocks 9
7.1 Types of data blocks 9
7.2 Basic block 10
7.3 Special blocks 11
7.4 Structured extension blocks 12
7.5 Library extension block 13
7.6 Acquisition extension block 14
7.7 Library supplement block 14
7.8 Title block 15
7.9 ILL block 15
7.10 Unstructured extension blocks 16

Annex B (informative) Encoding examples 18

Annex C (normative) Cyclic redundancy check (CRC) 21

Annex D (informative) Reading optimization 22

Annex E (informative) Guidelines for regional profiling 23

Bibliography 24
