

ISO/TR 17797:2014-10 (E)

Electronic archiving - Selection of digital storage media for long term preservation

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Methodology	1
5	Choice of storage system/media	2
6	Hard disk drive	3
6.1	General	3
6.2	Reasons for failure	3
6.3	Quality indicators	4
6.4	Technical arrangements	7
6.5	Control tools	8
7	Magnetic tape	9
7.1	General	9
7.2	Reasons for failure	9
7.3	Quality indicators	10
7.4	Technical arrangements	10
7.5	Control tools	11
8	Solid state drive (SSD), flash memory	11
8.1	General	11
8.2	Reasons for failure	12
8.3	Quality indicators	12
8.4	Technical arrangements	12
8.5	Control tools	13
9	Optical discs (recordable and rewritable)	14
9.1	General	14
9.2	Reasons for failure	14
9.3	Quality indicators	14
9.4	Technical arrangements	15
9.5	Control tools	16
10	General requirements for long-term preservation	17
10.1	General	17
10.2	Media traceability	17
10.3	Optimal storage identification	17
10.4	Duplication of storage	17
10.5	Media stocktaking	17
10.6	Periodic inspection	18
11	Selection of media	18
11.1	General	18

11.2	Volume of information	18
11.3	Size of individual items	18
11.4	Retention period of the information	19
11.5	Capacity of the media	19
11.6	Technology already in use within the organization	19
11.7	Retrieval and accessibility requirements	19
11.8	Exposure to threats to media	20
11.9	Costs	20
11.10	Records management, regulatory, and discovery	20
11.11	Technology refresh cycle/software migration	20
11.12	Industry acceptance and maturity	20
Annex A (informative) RAID		21
Annex B (informative) SMART		23
