## Electronic archiving - Selection of digital storage media for long term preservation

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Methodology .....	1
5	Choice of storage system/media .....	2
6	Hard disk drive .....	3
6.1	General .....	3
6.2	Reasons for failure .....	3
6.3	Quality indicators .....	4
6.4	Technical arrangements .....	7
6.5	Control tools .....	8
7	Magnetic tape .....	9
7.1	General .....	9
7.2	Reasons for failure .....	9
7.3	Quality indicators .....	10
7.4	Technical arrangements .....	10
7.5	Control tools .....	11
8	Solid state drive (SSD), flash memory .....	11
8.1	General .....	11
8.2	Reasons for failure .....	12
8.3	Quality indicators .....	12
8.4	Technical arrangements .....	12
8.5	Control tools .....	13
9	Optical discs (recordable and rewritable) .....	14
9.1	General .....	14
9.2	Reasons for failure .....	14
9.3	Quality indicators .....	14
9.4	Technical arrangements .....	15
9.5	Control tools .....	16
10	General requirements for long-term preservation .....	17
10.1	General .....	17
10.2	Media traceability .....	17
10.3	Optimal storage identification .....	17
10.4	Duplication of storage .....	17
10.5	Media stocktaking .....	17
10.6	Periodic inspection .....	18
11	Selection of media .....	18
11.1	General .....	18

11.2	Volume of information .....	18
11.3	Size of individual items .....	18
11.4	Retention period of the information .....	19
11.5	Capacity of the media .....	19
11.6	Technology already in use within the organization .....	19
11.7	Retrieval and accessibility requirements .....	19
11.8	Exposure to threats to media .....	20
11.9	Costs .....	20
11.10	Records management, regulatory, and discovery .....	20
11.11	Technology refresh cycle/software migration .....	20
11.12	Industry acceptance and maturity .....	20
Annex A (informative) RAID .....		21
Annex B (informative) SMART .....		23
Bibliography .....		24
