Foreword v

Introduction vi

1 Scope 1

2 Terms and definitions 1

3 International standard industrial classification 4

4 Effluent pretreatment requirements 4

5 Stream standards 5

6 Disposal of photo processing effluents using septic tanks and leach fields 5

7 Trade effluents consents 5

8 Photographic processing effluent characteristics 6
8.1 General 6
8.2 Temperature 9
8.3 Oxygen demand 9
8.3.1 General 9
8.3.2 BOD5 9
8.3.3 COD 10
8.4 Suspended solids 10
8.5 Chlorine demand 10
8.6 pH 10
8.7 Heavy metals 10
8.7.1 General 10
8.7.2 Silver 11
8.7.3 Chromium compound 11
8.7.4 Iron complexes 11
8.7.5 Zinc 12
8.7.6 Cadmium 12
8.7.7 Other heavy metals 12
8.8 Phenols 12
8.9 Cyano complexes 12
8.10 Thiocyanate 13
8.11 Hydroquinone 13
8.12 Ammonium 13
8.13 Phosphates and nitrates 13
8.14 Detergents, oils, and tars 13
8.15 Colour and odour 13
8.16 Flammable and explosive materials 13
8.17 Volatile organic compounds (VOC) 14

9 Effluent sampling 14
9.1 General 14
9.2 Sampling techniques 15
9.2.1 General 15

9.2.2 Grab sampling 15
9.2.3 Composite sampling 16
9.2.4 Continuous sampling 16

10 Handling samples for analysis 16

11 Pollution prevention 16
11.1 General 16
11.2 Squeegees 17
11.2.1 General 17
11.2.2 Types of squeegees 17

11.3 Replenishment rates 17
11.4 Good housekeeping 18

12 Dilution (equalization) 18
12.1 General 18
12.2 Holding tank 18

13 Silver recovery 19
13.1 General 19
13.2 Regulatory compliance 19
13.3 Silver recovery techniques 20

14 Commercial disposal services 20

15 Current issues in environmental and work place safety regulations affecting microfilm processing laboratories 20

16 Hazardous waste resulting from photo processing 21

17 Container storage requirements and labelling 22

18 Emergency contingency plans and procedures 22

19 Land disposal criteria 23

20 Storm water regulations 23

21 Air pollution considerations 23

22 General guidelines for ventilating photographic processing areas 24
22.1 General 24
22.2 Ventilation guidelines 24

23 Regulation of photographic processing air emissions 26

Annex A (informative) Assistance from manufacturers 27

Annex B (informative) Sample written Hazard Communication Programme in the United States of America(Provided by U.S. Department of Labour/OSHA) 28

Annex C (informative) References, statutes, and regulations applicable to the United States of America 30

Annex D (informative) General guidelines for ventilating photographic processing areas 44

Annex E (informative) Environmental protection in France 46

Annex F (informative) Environmental protection in the United Kingdom 48

Bibliography 50
