ISO/TR 19815:2018-07 (E)

Information and documentation - Management of the environmental conditions for archive and library collections

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 General 6

5 Management of environment for optimization of preservation and sustainability 8

6 Temperature 10

7 Relative humidity 11

8 Climate and its consequences for collections 13
8.1 General 13
8.2 Seasonal climates 15

9 Insects and other pests 15

10 Pollution 15

11 Light 16

12 Settingatemperatureandrelativehumidityspecification 18

13 Psychrometrics 22

14 Good practices for sustainability 27
14.1 General 27
14.2 Arnamagnaean Institute archive, Copenhagen, Denmark 28
14.3 Territorial archives, St Martin, West Indies 28
14.4 Japanese Imperial Archives, Tokyo 28
14.5 Jersey Archive, Jersey, Channel Islands 28
14.6 Norwegian National Library, Mo i Rana 29
14.7 Central State Archive of Saxony, Dresden, Germany 29
14.8 National Library of Singapore 29
14.9 Archives départmentales du Nord, Lille, France 29
14.10 School library, Gando, Burkina Faso 29

15 Educational and assessment tools 29
15.1 General 29
15.1.1 Overview 29
15.1.2 Isoperm 30
15.1.3 Preservation index (PI) and time weighted preservation index (TWPI) 30
15.2 Environmental management tools and assessments 31
15.2.1 General 31

15.2.2 Fundamental microclimate concepts 31
15.2.3 Air exchange between an enclosure and its surroundings 31
15.2.4 Calculator for atmospheric moisture 32
15.2.5 Calculator for energy use in museums 32
15.2.6 Calculator for conservation heating 32
15.2.7 Calculator for dehumidification energy load 32

Annex A (informative) Energy economy 33

Annex B (informative) Impact of temperature 38

Annex C (informative) Impact of relative humidity 40

Annex D (informative) Material damage associated with temperature and relative humidity 43

Annex E (informative)Sourcesofpollutantsandtheirimpactonmaterialssignificantto archive or library collections 46

Annex F (informative) Interactions between temperature, RH, light and pollution 50

Bibliography 51
