Information and documentation - Principles of identification

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Optimal attributes of identifiers and identifier systems 4
4.1 Uniqueness 4
4.2 Persistence 4
4.3 Granularity of the identifier to suit the needs of the sector 4
4.4 Stability of kernel metadata 5
4.5 No ambiguity within its own namespace 5
4.6 Access 5
4.7 Scope 6
4.8 Absence of semantics in identifier strings 6
4.9 Resolution 6
4.10 Timing of assignment 6
4.11 Resilience in the face of errors 6
4.12 Economic sustainability of the identifier system 7
4.13 Trustworthiness 7
