

DIN EN 16602-70-54:2016-07 (E)

Space product assurance - Ultracleaning of flight hardware; English version prEN
16602-70-54:2016

Contents

Page

European foreword.....	6
Introduction.....	7
1 Scope.....	8
2 Normative references	9
3 Terms, definitions and abbreviated terms.....	10
3.1 Terms from other standards.....	10
3.2 Terms specific to the present standard	10
3.3 Abbreviated terms.....	12
4 Principles	13
4.1 Cleaning technologies: Contamination removal	13
4.1.1 Introduction	13
4.1.2 Ultracleaning	16
4.1.3 Cleaning principles.....	16
4.1.4 Trade-off process.....	18
4.1.5 Selection of an end-to-end cleaning process.....	19
5 Requirements.....	21
5.1 Specifying process.....	21
5.1.1 General	21
5.1.2 Specifying process means	21
5.2 Definition of end-to-end cleaning process	22
5.2.1 Test samples.....	22
5.2.2 Definition of critical contamination and tracers	22
5.2.3 Application process for critical contaminants and tracers	23
5.2.4 Selection of analytical techniques	24
5.2.5 Definition of test matrix.....	24
5.2.6 Cleaning processes.....	24
5.2.7 Cleaning efficacy.....	25
5.3 Validation of end-to-end cleaning process	27
5.4 Packaging, containerization, transportation, storage.....	28

Annex A (normative) Request for ultracleaning - DRD	29
A.1 DRD identification	29
A.2 Purpose and objective	29
A.3 Expected response	29
A.3.1 Scope and content	29
A.3.2 Special remarks	29
Annex B (normative) Ultracleaning work proposal - DRD	30
B.1 DRD identification	30
B.2 Purpose and objective	30
B.3 Expected response	30
B.3.1 Scope and content	30
B.3.2 Special remarks	31
Annex C (normative) Ultracleaning process report - DRD	32
C.1 DRD identification	32
C.2 Purpose and objective	32
C.3 Expected response	32
C.3.1 Scope and content	32
C.3.2 Special remarks	33
Annex D (informative) Good cleanability design guidelines	34
D.1 Conception and design guidelines	34
D.1.1 General	34
D.1.2 Corners and edges	35
D.1.3 Weld seams at corners and edges	36
D.1.4 Transitions	37
D.1.5 Fixed/separable joins:	37
Annex E (informative) Cleaning technologies	39
E.1 Blasting cleaning techniques	39
E.1.1 Compressed air blasting	39
E.1.2 Wet compressed air blasting	39
E.1.3 Pressurized fluid blasting	40
E.1.4 Low-pressure water jet blasting	40
E.1.5 Elutriation blasting	40
E.1.6 Centrifugal blasting	41
E.1.7 Steam blasting	41
E.1.8 CO ₂ pellet cleaning	42
E.1.9 Accelerated CO ₂ snow cleaning	43

E.2	Mechanical cleaning	44
E.2.1	Wiping	44
E.2.2	Brushing and sweeping	45
E.2.3	Scraping and abrading	45
E.2.4	Grinding	46
E.2.5	Beating off	46
E.3	Fluidic cleaning	46
E.3.1	Washing and rinsing	46
E.3.2	Blowing off cleaning	47
E.3.3	Suction cleaning	47
E.3.4	Ultrasonic cleaning	48
E.4	Chemical cleaning	49
E.4.1	General principle	49
E.4.2	Etching and leaching	49
E.4.3	Chemical reaction	49
E.5	Solvent Cleaning	50
E.5.1	Detaching and Acid-Etching	50
E.6	Thermal Cleaning	50
E.6.1	Evaporating	50
E.6.2	Scarfig	51
E.6.3	Decomposing	51
E.7	Special Cleaning	52
E.7.1	Hot vacuum purge	52
E.7.2	Hot N ₂ purge	52
E.7.3	Plasma Chamber cleaning	53
E.7.4	UV-light cleaning	53
E.7.5	LASER beam cleaning	53
E.7.6	Supercritical CO ₂ Cleaning	54
E.7.7	Liquid Peel Cleaning	54
Annex F	(informative) Contamination Detection Technologies	56
F.1	Particulate contamination	56
F.1.1	General	56
F.1.2	Assessment matrix	56
F.2	Chemical molecular contamination	60
F.3	Microbiological Contamination	60
Annex G	(informative) Witness sample design	61
G.1	Example witness sample design	61

Annex H (informative) Examples for cleanliness classification.....	62
H.1 Viable and non-viable particles	62
H.1.1 Classification system.....	62
H.1.2 Examples for cleaning efficacy	63
H.2 Molecular contamination	64
H.2.1 Classification system.....	64
H.2.2 Examples for cleaning efficacy	65
Bibliography.....	66

Figures

Figure 4-1: Typical types of molecular and particulate contamination	13
Figure 4-2: Relationship between van der Waals force and weight in dependence upon particle diameter.....	14
Figure 4-3: Influences on the cleaning efficacy	15
Figure 4-4: Available cleaning principles and related technologies	17
Figure 4-5: Two stage trade-off method.....	18
Figure 4-6: Logic flow for the selection and optimisation of an end-to-end cleaning process for hardware.....	20
Figure 5-1: Cleanliness validation logic for using witness plates.....	27
Figure 5-2: Cleanliness validation logic for using products or components	28
Figure D-1 : Design of corners and edges	36
Figure D-2 : Material transitions joined by a weld seam.....	37
Figure D-3 : Materials joined by a weld seam	37
Figure G-1 : Test sample geometry to assess the cleaning efficacy of a certain cleaning technology (left) and composition of the test sample surface (right)	61

Tables

Table 4-1: Typical cleanliness levels and their verification techniques on spacecraft surfaces	16
Table F-1 : Comparison of different direct particle detection methods	59
Table H-1 : Selected SCP classes for cleanrooms and associated controlled environments	62
Table H-2 : Examples of cleaning efficacies on different substrates	63
Table H-3 : Overview of ISO SCC molecular contamination classes	64
Table H-4 : Examples of cleaning efficacies on different substrates	65
