

Table of contents

European Foreword.....	6
1 Scope.....	7
2 Normative references.....	8
3 Terms, definitions and abbreviated terms.....	9
3.1 Terms from other standards.....	9
3.2 Terms specific to the present standard	10
3.3 Abbreviated terms.....	15
3.4 Nomenclature	17
4 Principles	18
5 Fracture control programme	20
5.1 General.....	20
5.2 Fracture control plan.....	21
5.3 Reviews.....	21
5.3.1 General.....	21
5.3.2 Safety and project reviews	21
6 Identification and evaluation of PFCI.....	23
6.1 Identification of PFCIs.....	23
6.2 Evaluation of PFCIs	26
6.2.1 Damage tolerance.....	26
6.2.2 Fracture critical item classification.....	28
6.3 Compliance procedures.....	28
6.3.1 General.....	28
6.3.2 Safe life items	29
6.3.3 Fail-safe items.....	29
6.3.4 Contained and restrained items.....	30
6.3.5 Low-risk fracture items	31
6.4 Documentation requirements.....	37
6.4.1 Fracture control plan	37
6.4.2 Lists	37

6.4.3	Analysis and test documents.....	37
6.4.4	Fracture control summary report	37
7	Fracture mechanics analysis.....	39
7.1	General.....	39
7.2	Analytical life prediction	40
7.2.1	Identification of all load events	40
7.2.2	Identification of the most critical location and orientation of the crack.....	41
7.2.3	Derivation of stresses for the critical location.....	41
7.2.4	Derivation of the stress spectrum	41
7.2.5	Derivation of material data	42
7.2.6	Identification of the initial crack size and shape.....	43
7.2.7	Identification of an applicable stress intensity factor solution.....	45
7.2.8	Performance of crack growth calculations	46
7.3	Critical crack-size calculation	46
8	Special requirements	48
8.1	Introduction.....	48
8.2	Pressurized hardware.....	48
8.2.1	General	48
8.2.2	Pressure vessels.....	49
8.2.3	Pressurized structures	50
8.2.4	Pressure components, including lines and fittings	51
8.2.5	Low risk sealed containers	52
8.2.6	Hazardous fluid containers.....	52
8.2.7	Pressurized components with non-hazardous LBB failure mode	53
8.3	Welds	53
8.3.1	Nomenclature.....	53
8.3.2	Safe life analysis of welds	54
8.4	Composite, bonded and sandwich structures.....	55
8.4.1	General	55
8.4.2	Defect assessment.....	55
8.4.3	Damage threat assessment	57
8.4.4	Compliance procedures	59
8.5	Non-metallic items other than composite, bonded, sandwich and glass items	61
8.6	Rotating machinery.....	62
8.7	Glass components	62
8.8	Fasteners	63
8.9	Alloys treated with electric discharge manufacturing (EDM).....	64

9 Material selection	65
10 Quality assurance and NDT	66
10.1 Overview	66
10.2 Nonconformances	66
10.3 NDT of PFCI	66
10.3.1 General	66
10.3.2 NDT of raw material	68
10.3.3 NDT of safe life finished items	68
10.4 Non-destructive testing of metallic materials	69
10.4.1 <<deleted>>	69
10.4.2 NDT categories versus initial crack size	69
10.4.3 <<deleted>>	70
10.5 <<deleted>>	70
10.6 Traceability	70
10.6.1 General	70
10.6.2 Requirements	70
10.7 Detected defects	71
10.7.1 General	71
10.7.2 Acceptability verification	72
10.7.3 Improved probability of detection	73
11 Reduced fracture control programme	74
11.1 Applicability	74
11.2 Requirements	74
11.2.1 General	74
11.2.2 Modifications	74
Annex A (informative) The ESACRACK software package	81
Annex B (informative) References	82
Bibliography	83
