

# E DIN EN 4533-002:2024-06 (E)

Erscheinungsdatum: 2024-04-26

Aerospace series - Fibre optic systems - Handbook - Part 002: Test and measurement; English version prEN 4533-002:2024

---

<b>Contents</b>		<b>Page</b>
European foreword .....		3
Introduction.....		4
1 Scope.....		5
2 Normative references.....		5
3 Terms and definitions.....		5
4 Fibre types.....		5
5 Test and measurement: key parameters .....		6
5.1 Insertion loss (I.L.) .....		6
5.2 Return or reflection loss.....		7
5.3 Optical power measurement .....		8
5.4 Light distribution.....		11
5.5 Temporal measurements.....		11
6 Test and measurement in single-mode systems.....		11
7 Test and measurement in multi-mode systems.....		12
7.1 General.....		12
7.2 Launch conditions.....		12
7.3 Generating suitable launch conditions .....		16
7.4 Examples of suitable launch conditions for aerospace testing .....		17
8 Testing network paths: reflectometry and footprinting .....		22
8.1 General.....		22
8.2 OTDRs.....		23
8.3 OFDRs.....		26
8.4 Footprinting.....		28
9 General considerations for test and measurement in fibre optic systems .....		29
9.1 General.....		29
9.2 Instrument-issues.....		29
9.3 Test leads .....		29
9.4 Adapters (uniterers).....		30
9.5 Connectors.....		30
9.6 Filters and test leads.....		32
10 Practical testing techniques.....		32
10.1 General.....		32
10.2 Insertion loss .....		33
10.3 Different insertion loss techniques .....		33
10.4 Single connector insertion loss.....		38
10.5 Mode conditioning in test leads.....		38
10.6 Return loss schemes .....		39
11 Reporting arrangements.....		41
12 Techniques for system design .....		41
12.1 General.....		41
12.2 Interpretation of component data sheets .....		41
12.3 Computer modelling.....		42
13 Appendix: matrices .....		44
Bibliography .....		47
