

ISO 16378:2013-12 (E)

Space systems - Measurements of thermo-optical properties of thermal control materials

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	4
5	Preparatory conditions	4
5.1	Hazards, health, and safety precautions	4
5.2	Preparation of samples	5
5.3	Facilities	5
5.4	Standard Materials	6
6	Solar absorptance (s) test methods	7
7	Hemispherical infrared emittance (h) test method	7
8	Normal infrared emittance (n) test methods	7
9	Test report	8
9.1	Standard tests	8
9.2	Non-standard tests	9
10	Quality assurance	9
10.1	Precision	9
10.2	Non-conformance	10
10.3	Calibration	10
10.4	Traceability	10
11	Audit of measurement equipment	10
11.1	General	10
11.2	Initial audit of the system (acceptance)	10
11.3	Annual regular review (maintenance) of the system	10
11.4	Special review	11
Annex A (normative) Solar absorptance using a spectrophotometer (s)		12
Annex B (normative) Solar absorptance using the comparative test method (p)		17
Annex C (normative) Hemispherical infrared emittance using the thermal test method (h-t)		19
Annex D (normative) Normal infrared emittance using an IR spectrometer (n-s)		23
Annex E (normative) Normal infrared emittance using ellipsoid collector optics (n-e)		26
Annex F (normative) Normal infrared emittance using two rotating cavities (n-c)		31

Annex G (informative) Key parameters for measurement	34
Annex H (informative) Theoretical directional emittance	35
Bibliography	36
