

ISO 19933:2007-07 (E)

Space systems - Format for spacecraft launch environment test report

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms, definitions and abbreviated terms	1
3.1	Terms and definitions	1
3.2	Abbreviated terms	2
4	Introduction section of a test report	2
4.1	General	2
4.2	Overall test sequence	2
5	Referenced documentation section of a test report	3
5.1	General	3
5.2	Normative references	3
5.3	Applicable references	3
5.4	Informative references	4
6	Nomenclature section of a test report	4
7	Test objective section of a test report	4
7.1	General	4
7.2	Test strategy matrix	4
8	Test article configuration section of a test report	4
8.1	General	4
8.2	Identification and general configuration matrix	5
8.3	Deviations from flight configuration	5
8.4	Functional configuration	5
9	Test facility configuration section of a test report	5
9.1	General	5
9.2	Test configuration	5
9.3	Test facility constraints and limitations	6
10	Test description section of a test report	6
10.1	General	6
10.2	Test approach and methodology	6
10.3	Test flow	6
10.4	Supporting analyses	6
10.5	Input parameters, tolerances and limits	6
10.6	Instrumentation	6
10.7	Success criteria	6
11	Test results section of test reports	7
11.1	Static load	7
11.2	Modal survey	8
11.3	Sine vibration	9

11.4	Acoustic noise	11
11.5	Random vibration	13
11.6	Shocks	14
11.7	Electromagnetic compatibility	16
12	Test result evaluation section of a test report	17
13	Test deviations section of a test report	17
14	Test conclusion section of a test report	18
	Bibliography	19
