Aerospace - Requirements for digital equipment for measurements of aircraft electrical power characteristics

| Contents | | Page |
|--------------------|--|-------------|
| Foreword | | iv |
| Introduction | | v |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 1 |
| 4 | Symbols | 1 |
| 5 | Measurement requirements for the aircraft electric power characteristics | 3 |
| 5.1 | General rules, measurement states and the admissible errors of the measurement results | 3 |
| 5.1.1 | General | 3 |
| 5.1.2 | Measurement states | 3 |
| 5.1.3 | Admissible errors of the measurement results | 3 |
| 5.2 | Measurement of constant frequency (CF) a.c. power system characteristics | 4 |
| 5.2.1 | Steady state characteristics | 4 |
| 5.2.2 | Transient characteristics | 8 |
| 5.3 | Measurement of variable frequency (VF) a.c. power system characteristics | 8 |
| 5.4 | Measurement of d.c. power system characteristics (28 V or 42 V system) | 8 |
| 5.4.1 | Steady state characteristics | 8 |
| 5.4.2 | Transient d.c. voltage | 10 |
| 5.5 | Measurement of current parameter | 10 |
| 5.6 | Measurement of power transfer characteristics | 10 |
| 5.7 | Measurement of voltage spike characteristics | 10 |
| 5.8 | Measurement of power factor | 10 |
| 6 | General requirements for the measuring equipment | 11 |
| 6.1 | Applicability | 11 |
| 6.1.1 | Efficiency | 11 |
| 6.1.2 | Operating environment | 11 |
| 6.2 | Performance and functions | 11 |
| 6.2.1 | Accuracy | 11 |
| 6.2.2 | Scope of the measuring equipment | 11 |
| 6.2.3 | Measurement resolution | 11 |
| 6.2.4 | Input impedance | 11 |
| 6.2.5 | Sampling frequency range | 12 |
| 6.3 | Electromagnetic compatibility | 12 |
| 6.4 | Human-machine interface project | 12 |
| 6.5 | The regulation of select measuring equipment | 12 |
| 6.5.1 | The measurement regulation of the data process software | 12 |
| 6.5.2 | Selecting requirement | 12 |
