Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Symbols and abbreviated terms 11

5 Tailoring 13

6 Requirements 13
6.1 General 13
6.2 Design requirements 13
6.3 Material requirements 18
6.4 Manufacturing and interfaces requirements 21
6.5 Quality assurance 23
6.6 Traceability 25
6.7 Deliverables 25
6.8 In-service requirements 26
6.9 Maintenance requirements 26
6.10 Repair and refurbishment 28

7 Verification of general requirements 28
7.1 General 28
7.2 Verification of design requirements 29
7.3 Acceptance tests 39
7.4 Qualification progamme (qualification tests) 40

8 Special structural items 42
8.1 General 42
8.2 Special structural items with published standards 42
8.3 Special structural items without published standards 42

9 Documentation requirements 43
9.1 Interface control documents 43
9.2 Applicable (contractual) documents 44
9.3 Analysis reports 44

10 Data exchange 46
10.1 Data set requirements 46
10.2 System configuration data 46
10.3 Data exchange between design and structural analysis 46
10.4 Data exchange between structural design and manufacturing 46
10.5 Data exchange with other subsystems 47
10.6 Tests and structural analysis 47
10.7 Structural mathematical models 47

Annex A (informative) Recommended best practices for structural design 48

Annex B (informative) Design requirements verification methods 58

Annex C (informative) Design requirements verification methods 61

Annex D (informative) Margin of safety for combined loads 64

Bibliography 65
