ISO 10784-1:2011-12 (E)

Space systems - Early operations - Part 1: Spacecraft initialization and commissioning

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms, definitions and abbreviated terms 1
3.1 Terms and definitions 1
3.2 Abbreviated terms 2

4 Introduction clause of an initialization plan or commissioning report 2
4.1 General 2
4.2 Overall sequence of initialization events 2
4.3 Overall relations of commissioning functions 2
4.4 Orbital-debris considerations in spacecraft initialization and commissioning 2

5 Objectives of spacecraft initialization and commissioning 3
5.1 General 3
5.2 Spacecraft initialization and commissioning strategy matrix 3

6 Spacecraft configuration for spacecraft initialization and commissioning 5
6.1 General 5
6.2 Identification and general configuration 5
6.3 Deviations from the planned configuration 5
6.4 Functional configuration 5

7 Spacecraft initialization plan 5
7.1 General 5
7.2 Spacecraft configuration 6
7.3 Initialization constraints and limitations 6

8 Spacecraft commissioning report 6
8.1 General 6
8.2 Approach and methodology 6
8.3 Event flow 6
8.4 Supporting analyses 6
8.5 Input parameters, tolerances, and limits 7
8.6 Instrumentation 7
8.7 Success criteria 7
8.8 Evaluation of results 7
8.9 Deviations 7
8.10 Conclusion 7
