## Space environment (natural and artificial) - Geomagnetic reference models

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
<b>1</b>	<b>Scope .....</b>	<b>1</b>
<b>2</b>	<b>Reference frames .....</b>	<b>1</b>
2.1	General .....	1
2.2	Geocentric reference frame .....	2
2.3	Geodetic reference frame .....	2
2.4	Geodetic to geocentric coordinate transform .....	3
<b>3</b>	<b>Specification of the geomagnetic field vector .....</b>	<b>3</b>
3.1	General .....	3
3.2	Magnetic vector components in the geocentric frame .....	4
3.3	Magnetic elements in the geodetic reference frame .....	4
3.4	Transform of magnetic vector components from geocentric to geodetic frame .....	6
<b>4</b>	<b>Specification of the geomagnetic reference model .....</b>	<b>6</b>
4.1	Potential of the magnetic field .....	6
4.2	Geomagnetic reference radius .....	8
4.3	Epoch of a sub-model .....	8
4.4	Validity of a sub-model .....	8
4.5	Time-dependence of Gauss coefficients .....	8
4.6	Calculation of magnetic vector components in the geocentric reference frame .....	9
4.7	Spatial wavelength .....	10
4.8	Root-mean-square difference between two model fields .....	10
<b>5</b>	<b>Examples of the use of geomagnetic reference models .....</b>	<b>11</b>
5.1	Compute reference magnetic elements near the Earth's surface .....	11
5.2	Compute reference magnetic vector in near-Earth space .....	11
5.3	Compute reference magnetic vector in magnetosphere .....	12
<b>Annex A (informative) Available geomagnetic reference models .....</b>		<b>13</b>
<b>Bibliography .....</b>		<b>18</b>
