DIN EN 16603-32-03:2014-10 (E)

Space engineering - Structural finite element models; English version EN 16603-32-03:2014

Table of contents

Foreword 4

Introduction 5

1 Scope 6

2 Normative references 7

3 Terms, definitions and abbreviated terms 8

3.1 Terms from other standards 8

3.2 Terms specific to the present standards 8

3.3 Abbreviated terms 9

3.4 Symbols 10

4 General requirements 11

4.1 Overview 11

4.2 Coordinate systems and unit system 11

4.3 Modelling requirements 12

4.4 Requirements for reduced models 12

5 Model checks 14

5.1 General 14

5.2 Model geometry checks for non reduced models 14

5.3 Elements topology checks for non reduced models 14

5.4 Rigid body motion checks for reduced and non reduced models 15

5.4.1 Overview 15

5.4.2 Rigid body motion mass matrix 15

5.4.3 Rigid body motion strain energy and residual forces check 15

5.5 Static analysis checks for reduced and non reduced models 16

5.6 Stress free thermo-elastic deformation check for non reduced models 17

5.7 Modal analysis checks 18

5.8 Reduced model versus non reduced model consistency checks 18

6 Test – Analysis correlation 19

6.1 Overview 19

6.2 Provisions 19
