Page

Foreword	5
Introduction.....	6
1 Scope.....	8
2 Normative references	10
3 Terms, definitions and abbreviated terms.....	12
3.1 Terms from other standards.....	12
3.2 Terms specific to the present standard	18
3.3 Abbreviated terms.....	24
4 General requirements.....	27
4.1 Test programme	27
4.2 Development test prior qualification	27
4.3 Test management.....	28
4.3.1 General	28
4.3.2 Test reviews.....	28
4.3.3 Test documentation.....	32
4.3.4 Anomaly or failure during testing	33
4.3.5 Test data.....	33
4.4 Test conditions, tolerances, and accuracies.....	33
4.4.1 Test conditions.....	33
4.4.2 Test tolerances	34
4.4.3 Test accuracies.....	36
4.5 Test objectives.....	38
4.5.1 General requirements	38
4.5.2 Qualification testing.....	38
4.5.3 Acceptance testing.....	39
4.5.4 Protoflight testing	39
4.6 Retesting	40
4.6.1 Overview	40

4.6.2	Implementation of a design modification after completion of qualification	40
4.6.3	Storage after protoflight or acceptance testing	40
4.6.4	Space segment element or equipment to be re-flown.....	41
4.6.5	Flight use of qualification Space segment element or equipment	42
5	Space segment equipment test requirements	43
5.1	General requirements	43
5.2	Qualification tests requirements.....	45
5.3	Acceptance test requirements	53
5.4	Protoflight test requirements	59
5.5	Space segment equipment test programme implementation requirements	66
5.5.1	General tests.....	66
5.5.2	Mechanical tests	69
5.5.3	Structural integrity tests.....	72
5.5.4	Thermal tests	73
5.5.5	Electrical/RF tests	75
5.5.6	Mission specific test	76
6	Space segment element test requirements.....	78
6.1	General requirements	78
6.2	Qualification test requirements	79
6.3	Acceptance test requirements	86
6.4	Protoflight test requirements	91
6.5	Space segment elements test programme implementation requirements	98
6.5.1	General tests.....	98
6.5.2	Mechanical tests	102
6.5.3	Structural integrity tests.....	107
6.5.4	Thermal tests	108
6.5.5	Electromagnetic tests.....	110
6.5.6	Mission specific tests	111
6.5.7	Crewed mission specific tests	111
7	Pre-launch testing	113
Annex A (normative)	Assembly, integration and test plan (AITP) - DRD.....	115
Annex B (normative)	Test specification (TSPE) - DRD.....	118
Annex C (normative)	Test procedure (TPRO) - DRD	121

Annex D (informative) Guidelines for tailoring and verification of this standard	124
Bibliography.....	128

Figures

Figure 3-1: Space system breakdown	13
Figure 3-2: Space segment examples	17
Figure 5-1: Space segment equipment test sequence	45
Figure D-1 : Logic for customer tailoring and supplier answer through compliance and verification matrix	126
Figure D-2 : Clauses selection in First step of the tailoring	126

Tables

Table 4-1: Allowable tolerances.....	35
Table 4-2: Test accuracies	37
Table 5-1: Space segment equipment - Qualification test baseline.....	46
Table 5-2: Space segment equipment - Qualification test levels and duration	48
Table 5-3: Space segment equipment - Acceptance test baseline.....	54
Table 5-4: Space segment equipment - Acceptance test levels and duration	56
Table 5-5: Space segment equipment - Protoflight test baseline	60
Table 5-6: Space segment equipment - Protoflight test levels and duration.....	62
Table 6-1: Space segment element - Qualification test baseline.....	80
Table 6-2: Space segment element - Qualification test levels and duration	82
Table 6-3: Space segment element - Acceptance test baseline.....	86
Table 6-4: Space segment element - Acceptance test levels and duration	88
Table 6-5: Space segment element - Protoflight test baseline	92
Table 6-6: Space segment element - Protoflight test levels and duration.....	94
Table D-1 : Guideline for verification close-out	127
