

# DIN EN 16603-70-32:2014-12 (E)

Space engineering - Test and operations procedure language; English version EN 16603-70-32:2014

---

<b>Contents</b>	<b>Page</b>
<b>Foreword</b> .....	<b>5</b>
<b>Introduction</b> .....	<b>6</b>
<b>1 Scope</b> .....	<b>7</b>
<b>2 Normative references</b> .....	<b>8</b>
<b>3 Terms, definitions and abbreviated terms</b> .....	<b>9</b>
3.1 Terms from other standards .....	9
3.2 Terms specific to the present standard .....	9
3.3 Abbreviated terms .....	11
<b>4 Context of the procedure language</b> .....	<b>12</b>
4.1 Introduction .....	12
4.1.1 The space system .....	12
4.1.2 Satellite testing .....	13
4.1.3 Mission operations .....	14
4.2 EGSE and mission control system (EMCS) .....	14
4.2.1 General .....	14
4.2.2 Space system model .....	14
<b>5 Requirements to be satisfied by procedures</b> .....	<b>18</b>
5.1 Procedure structure .....	18
5.2 Language constructs .....	19
5.3 Language specification .....	22
<b>Annex A (informative) The PLUTO language</b> .....	<b>23</b>
A.1 The structure of a procedure .....	23
A.1.1 Procedure definition .....	23
A.1.2 Procedure declaration body .....	24
A.1.3 Procedure preconditions body .....	24
A.1.4 Procedure main body .....	25
A.1.5 Procedure watchdog body .....	25
A.1.6 Procedure confirmation body .....	26

A.1.7	Structure of a step.....	26
A.2	The behaviour of a procedure.....	28
A.2.1	Procedure execution flow.....	28
A.2.2	Step execution flow.....	31
A.2.3	Activity execution flow.....	33
A.2.4	Execution in parallel.....	34
A.2.5	Continuation following an “initiate and confirm” statement.....	35
A.3	PLUTO language definition.....	37
A.3.1	Conventions.....	37
A.3.2	Language case sensitivity.....	38
A.3.3	Comments.....	38
A.3.4	Keywords.....	38
A.3.5	Identifiers.....	39
A.3.6	Constants.....	40
A.3.7	Types.....	43
A.3.8	System interfaces.....	44
A.3.9	Language constructs.....	45
A.4	Extended Backus-Naur form (EBNF) representation of PLUTO language constructs.....	103
A.4.1	Conventions.....	103
A.4.2	PLUTO language constructs.....	105
A.5	Index of PLUTO language constructs.....	117
<b>Annex B (informative) Engineering units.....</b>		<b>120</b>
B.1	Introduction.....	120
B.2	Engineering units and symbols.....	120
B.3	Engineering units railroad diagrams.....	126
B.4	EBNF representation of the engineering units.....	129
<b>Annex C (informative) Functions.....</b>		<b>131</b>
C.1	Introduction.....	131
C.2	Mathematical functions.....	131
C.3	Time functions.....	134
C.4	String functions.....	135
<b>Bibliography.....</b>		<b>137</b>
<b>Figures</b>		
	Figure 4-1: Example of space system elements.....	13

Figure 4-2: Example of a space system model .....	16
Figure A-1 : Example of a procedure and its elements .....	24
Figure A-2 : Execution states and transitions for a procedure.....	31
Figure A-3 : Execution states and transitions for a step.....	33
Figure A-4 : Execution states and transitions for an activity.....	34
Figure A-5 : Confirmation status and continuation action combinations for main body “initiate and confirm” statements .....	36
Figure A-6 : Confirmation status and continuation action combinations for watchdog “initiate and confirm” statements .....	36
Figure A-7 : Example railroad diagram .....	38

## Tables

Table A-1 : Predefined types .....	43
Table A-2 : Activity and step operation requests.....	78
Table A-3 : Reporting data, variable and argument operation requests .....	78
Table A-4 : Predefined operators.....	97
Table A-5 : Activity and step property requests .....	101
Table A-6 : Reporting data, variable and argument property requests.....	102
Table A-7 : Event property requests .....	102
Table A-8 : EBNF symbols and meanings .....	104
Table B-1 : Simple engineering units .....	121
Table B-2 : Acceptable multiple and submultiple of engineering unit .....	123
Table B-3 : Acceptable multiples of binary engineering units .....	124
Table B-4 : Standard compound engineering units .....	124
Table C-1 : Mathematical functions .....	131
Table C-2 : Time functions .....	134
Table C-3 : String functions .....	135
