DIN EN 16603-70-31:2015-04 (E)

Space engineering - Ground systems and operations - Monitoring and control data definition; English version EN 16603-70-31:2015

Table of contents

Foreword **8**

Introduction **8**

1 Scope **10**

2 Normative references **11**

3 Terms, definitions and abbreviated terms **12**

3.1 Terms from other standards 12

3.2 Terms specific to the present standard 12

3.3 Abbreviated terms 13

4 Background and context **15**

4.1 The space system model 15

4.2 Monitoring and control view of the SSM 16

4.2.1 Introduction 16

4.2.2 Standard SSM definitions 16

4.2.3 Product-specific SSM tailoring 18

5 Conventions **20**

5.1 Data definition 20

5.2 Railroad diagrams 21

5.3 Case sensitivity 22

5.4 Names 22

5.5 Data types 24

5.5.1 General 24

5.5.2 Simple Data Types 25

5.5.3 Complex Data Types 37

6 Monitoring and control data requirements **38**

6.1 Data exchange 38

6.2 Specification of complex data types 39

6.2.1 General 39

6.2.2 Activity call 39

6.2.3 Expression 40
6.2.4 Interpretation function 40
6.2.5 Procedure 41
6.2.6 Synthetic parameter 41
6.2.7 Value set 42
6.3 Product data 42
6.3.1 Introduction 42
6.3.2 Product configuration data 43
6.4 Data population 47
6.5 System element data 49
6.5.1 Introduction 49
6.5.2 System element generic data 50
6.5.3 System data 51
6.5.4 Application process data 53
6.5.5 Service data 55
6.5.6 MAP data 93
6.5.7 VC data 93
6.5.8 Functions 94
6.5.9 Memory data 95
6.5.10 Memory sub-block data 95
6.5.11 Store data 96
6.5.12 CPDU data 97
6.5.13 On/Off device data 97
6.5.14 Register load device data 98
6.5.15 Sensor data 98
6.6 Reporting data 99
6.6.1 Introduction 99
6.6.2 General 99
6.6.3 Parameters 101
6.6.4 Compound parameters 104
6.6.5 Synthetic reporting data 106
6.6.6 Checking data 106
6.7 Activities 111
6.7.1 General 111
6.7.2 Activity argument value set 114
6.7.3 Activity execution data 114
6.7.4 Telecommands 118

6.7.5 Procedures 123
6.8 Events 125
Annex A (informative) PUS service tailoring 126
A.1 Introduction 126
A.2 Telecommand verification service 127
A.2.1 The PUS service model 127
A.2.2 Service tailoring data 128
A.2.3 Service requests and reports 129
A.3 Device command distribution service 131
A.3.1 The PUS service model 131
A.3.2 Service tailoring data 133
A.3.3 Service requests and reports 134
A.4 Housekeeping and diagnostic data reporting service 134
A.4.1 The PUS service model 134
A.4.2 Service tailoring data 136
A.4.3 Service requests and reports 142
A.5 Parameter statistics reporting service 148
A.5.1 The PUS service model 148
A.5.2 Service tailoring data 148
A.5.3 Service requests and reports 150
A.6 Event reporting service 151
A.6.1 The PUS service model 151
A.6.2 Service tailoring data 152
A.6.3 Service requests and reports 152
A.7 Memory management service 153
A.7.1 The PUS service model 153
A.7.2 Service tailoring data 154
A.7.3 Service requests and reports 156
A.8 Function management service 158
A.8.1 The PUS service model 158
A.8.2 Service tailoring data 158
A.8.3 Service requests and reports 159
A.9 Time management service 159
A.9.1 The PUS service model 159
A.9.2 Service tailoring data 160
A.9.3 Service requests and reports 160
A.10 On-board operations scheduling service 161

A.10.1 The PUS service model 161
A.10.2 Service tailoring data 162
A.10.3 Service requests and reports 164
A.11 On-board monitoring service 169
A.11.1 The PUS service model 169
A.11.2 Service tailoring data 169
A.11.3 Service requests and reports 173
A.12 Large data transfer service 177
A.12.1 The PUS service model 177
A.12.2 Service tailoring data 177
A.12.3 Service requests and reports 180
A.13 Packet forwarding control service 182
A.13.1 The PUS service model 182
A.13.2 Service tailoring data 182
A.13.3 Service requests and reports 184
A.14 On-board storage and retrieval service 187
A.14.1 The PUS service model 187
A.14.2 Service tailoring data 188
A.14.3 Service requests and reports 192
A.15 Test service 195
A.15.1 The PUS service model 195
A.15.2 Service tailoring data 195
A.15.3 Service requests and reports 196
A.16 On-board operations procedure service 196
A.16.1 The PUS service model 196
A.16.2 Service tailoring data 196
A.16.3 Service requests and reports 197
A.17 Event/action service 200
A.17.1 The PUS service model 200
A.17.2 Service tailoring data 200
A.17.3 Service requests and reports 202

Annex B (informative) Data type definitions 204

B.1 Conventions 204
B.2 Comments 205
B.3 Data types and data items 205
B.3.1 Definitions 205
B.3.2 EBNF Representation 206

B.4 Activity Call 214
B.5 EXPL - Expression Language 214
B.5.1 Definitions 214
B.5.2 EBNF Representation 216
B.6 IFL - Interpretation Function Language 218
B.6.1 Definition 218
B.6.2 EBNF Representation 220
B.7 SPEL - Synthetic Parameter Expression Language 222
B.7.1 Definitions 222
B.7.2 Bit-manipulation functions 227
B.7.3 EBNF Representation 228
B.8 PLUTO – Procedure Language 232
B.9 VAL – Value Language 233
B.9.1 Definition 233
B.9.2 EBNF Representation 234
