

DIN EN 16603-70-31:2015-04 (E)

Space engineering - Ground systems and operations - Monitoring and control data definition; English version EN 16603-70-31:2015

Table of contents

- Foreword8**
- Introduction.....8**
- 1 Scope..... 10**
- 2 Normative references 11**
- 3 Terms, definitions and abbreviated terms..... 12**
 - 3.1 Terms from other standards..... 12
 - 3.2 Terms specific to the present standard 12
 - 3.3 Abbreviated terms..... 13
- 4 Background and context..... 15**
 - 4.1 The space system model..... 15
 - 4.2 Monitoring and control view of the SSM..... 16
 - 4.2.1 Introduction 16
 - 4.2.2 Standard SSM definitions..... 16
 - 4.2.3 Product-specific SSM tailoring 18
- 5 Conventions 20**
 - 5.1 Data definition..... 20
 - 5.2 Railroad diagrams..... 21
 - 5.3 Case sensitivity..... 22
 - 5.4 Names 22
 - 5.5 Data types 24
 - 5.5.1 General 24
 - 5.5.2 Simple Data Types..... 25
 - 5.5.3 Complex Data Types..... 37
- 6 Monitoring and control data requirements..... 38**
 - 6.1 Data exchange 38
 - 6.2 Specification of complex data types..... 39
 - 6.2.1 General 39
 - 6.2.2 Activity call 39

6.2.3	Expression	40
6.2.4	Interpretation function	40
6.2.5	Procedure	41
6.2.6	Synthetic parameter	41
6.2.7	Value set.....	42
6.3	Product data	42
6.3.1	Introduction	42
6.3.2	Product configuration data	43
6.4	Data population	47
6.5	System element data	49
6.5.1	Introduction	49
6.5.2	System element generic data.....	50
6.5.3	System data.....	51
6.5.4	Application process data	53
6.5.5	Service data	55
6.5.6	MAP data	93
6.5.7	VC data.....	93
6.5.8	Functions	94
6.5.9	Memory data.....	95
6.5.10	Memory sub-block data.....	95
6.5.11	Store data	96
6.5.12	CPDU data.....	97
6.5.13	On/Off device data	97
6.5.14	Register load device data.....	98
6.5.15	Sensor data.....	98
6.6	Reporting data	99
6.6.1	Introduction	99
6.6.2	General.....	99
6.6.3	Parameters	101
6.6.4	Compound parameters	104
6.6.5	Synthetic reporting data	106
6.6.6	Checking data.....	106
6.7	Activities	111
6.7.1	General.....	111
6.7.2	Activity argument value set	114
6.7.3	Activity execution data	114
6.7.4	Telecommands	118

6.7.5	Procedures	123
6.8	Events	125
Annex A (informative) PUS service tailoring.....		126
A.1	Introduction.....	126
A.2	Telecommand verification service.....	127
A.2.1	The PUS service model	127
A.2.2	Service tailoring data.....	128
A.2.3	Service requests and reports	129
A.3	Device command distribution service.....	131
A.3.1	The PUS service model	131
A.3.2	Service tailoring data.....	133
A.3.3	Service requests and reports	134
A.4	Housekeeping and diagnostic data reporting service	134
A.4.1	The PUS service model	134
A.4.2	Service tailoring data.....	136
A.4.3	Service requests and reports	142
A.5	Parameter statistics reporting service	148
A.5.1	The PUS service model	148
A.5.2	Service tailoring data.....	148
A.5.3	Service requests and reports	150
A.6	Event reporting service	151
A.6.1	The PUS service model	151
A.6.2	Service tailoring data.....	152
A.6.3	Service requests and reports	152
A.7	Memory management service.....	153
A.7.1	The PUS service model	153
A.7.2	Service tailoring data.....	154
A.7.3	Service requests and reports	156
A.8	Function management service	158
A.8.1	The PUS service model	158
A.8.2	Service tailoring data.....	158
A.8.3	Service requests and reports	159
A.9	Time management service.....	159
A.9.1	The PUS service model	159
A.9.2	Service tailoring data.....	160
A.9.3	Service requests and reports	160
A.10	On-board operations scheduling service	161

A.10.1	The PUS service model	161
A.10.2	Service tailoring data.....	162
A.10.3	Service requests and reports	164
A.11	On-board monitoring service.....	169
A.11.1	The PUS service model	169
A.11.2	Service tailoring data.....	169
A.11.3	Service requests and reports	173
A.12	Large data transfer service	177
A.12.1	The PUS service model	177
A.12.2	Service tailoring data.....	177
A.12.3	Service requests and reports	180
A.13	Packet forwarding control service	182
A.13.1	The PUS service model	182
A.13.2	Service tailoring data.....	182
A.13.3	Service requests and reports	184
A.14	On-board storage and retrieval service	187
A.14.1	The PUS service model	187
A.14.2	Service tailoring data.....	188
A.14.3	Service requests and reports	192
A.15	Test service	195
A.15.1	The PUS service model	195
A.15.2	Service tailoring data.....	195
A.15.3	Service requests and reports	196
A.16	On-board operations procedure service.....	196
A.16.1	The PUS service model	196
A.16.2	Service tailoring data.....	196
A.16.3	Service requests and reports	197
A.17	Event/action service.....	200
A.17.1	The PUS service model	200
A.17.2	Service tailoring data.....	200
A.17.3	Service requests and reports	202
Annex B (informative) Data type definitions		204
B.1	Conventions.....	204
B.2	Comments	205
B.3	Data types and data items	205
B.3.1	Definitions	205
B.3.2	EBNF Representation	206

B.4	Activity Call	214
B.5	EXPL - Expression Language	214
B.5.1	Definitions	214
B.5.2	EBNF Representation	216
B.6	IFL - Interpretation Function Language	218
B.6.1	Definition	218
B.6.2	EBNF Representation	220
B.7	SPEL - Synthetic Parameter Expression Language	222
B.7.1	Definitions	222
B.7.2	Bit-manipulation functions	227
B.7.3	EBNF Representation	228
B.8	PLUTO – Procedure Language.....	232
B.9	VAL – Value Language.....	233
B.9.1	Definition.....	233
B.9.2	EBNF Representation	234

Bibliography.....236
