DIN EN 16602-70-30:2015-07 (E)

Space product assurance - Wire wrapping of high-reliability electrical connections; English version EN 16602-70-30:2014

Inhalt

Seite

Foreword 5

1 Scope 6

2 Normative references 8

3 Terms, definitions and abbreviated terms 9

3.1 Terms defined in other standards 9

3.2 Terms specific to the present standard 9

3.3 Abbreviated terms 10

4 Principles 11

5 Requirements 12

5.1 Preparatory conditions 12

5.1.1 Hazards, health and safety precautions 12

5.1.2 Facilities 12

5.1.3 Tools and equipment 13

5.1.4 Configuration of process and workpiece 15

5.1.5 Wire-wrap process certification 16

5.1.6 Requirements for new combinations of wire-wrap 16

5.2 Material selection 17

5.2.1 Wire 17

5.2.2 Terminal post 19

5.3 Wire-wrap operation 22

5.3.1 Preparation for wire-wrapping 22

5.3.2 Process and criteria 22

5.3.3 Number of turns on terminal post 24

5.3.4 Wire routing 25

5.3.5 Rework 25

5.4 Test methods 26

5.4.1 General 26

5.4.2 Stripping force 26

5.4.3 Unwrapping test 27

5.4.4 Connection resistance 27
5.4.5 Gas-tightness test 28
5.4.6 Metallography 28
5.4.7 Records of tests 29
5.5 Workmanship and acceptance criteria 29
5.5.1 Visual inspection 29
5.5.2 Replacement and rework 30
5.5.3 Performance tests 31
5.6 Quality assurance 32
5.6.1 General 32
5.6.2 Traceability 32
5.6.3 Data 33
5.6.4 Nonconformance 33
5.6.5 Calibration 35
5.6.6 Workmanship standards 35
5.6.7 Operator and inspector training and certification 35
5.6.8 Inspections 36
5.7 Document requirements 37

Annex A (informative) Procedure for wire-rapping 38

Bibliography 46

Figures

Figure 1-1: Single wire-wrapped connection to square terminal and reference corner 7
Figure 5-1: Minimum wrapping length on terminal post for each wire gauge 21
Figure 5-2: Terminal post dimensions over minimum wrapping length for each terminal size 21
Figure 5-3: Position and regularity of wrap connection 24
Figure 5-4: Wire-wrap rejection criteria which require reworking of the connection 31
Figure 5-5: Guide to quality assurance during wire wrapping 34
Figure 5-6: Guide to quality assurance during wire wrapping 34

Figure A-1 : Examples of approved wire-wrapping tools 39
Figure A-2 : Wire-wrap connection process 40
Figure A-3 : Hand unwrapping tools 41
Figure A-4 : Example of a daily process control sheet for test samples 43
Figure A-5 : Stripping force test fixture 44
Figure A-6 : Connection resistance test 44
Figure A-7 : Typical cross-section of wire-wrap (×64) 45

Figure A-8 : Gas-tightness test result 45

Tables

Table 5-1: Wire size to terminal post combinations 22
Table 5-2: Minimum number of wire turns on terminal post 25
Table 5-3: Minimum stripping force 27
Table 5-4: Test current for connection resistance 28
