ISO 19631:2015-09 (E)

Aerospace series - Tube fittings for fluid systems, 5 080 psi (35 000 kPa) - Qualification specification

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Requirements 1
3.1 Qualification 1
3.1.1 Manufacturer qualification 1
3.1.2 Product qualification 2
3.2 Materials 2
3.2.1 Fittings 2
3.2.2 Tubing 2
3.2.3 Testfluid 2
3.3 Environmental conditions 3
3.3.1 Pressures 3
3.3.2 Temperature 3
3.4 Design and manufacture 3
3.4.1 Fluid passages 3
3.5 Performance 3
3.5.1 Specimen preparation 3
3.5.2 Proof pressure 4
3.5.3 Gaseous pressure 4
3.5.4 Hydraulic impulse resistance 4
3.5.5 Ultimate pressure 5
3.5.6 Flexure fatigue resistance 5
3.5.7 Re-use capability 5
3.5.8 Tensile load capability 6
3.5.9 Thermal shock 6
3.5.10 Over-tightening 6
3.5.11 Electrical conductivity 6
3.5.12 Salt spray 7
3.5.13 Vibration 7
3.5.14 Fire test 11
3.5.15 System pressure test 11
3.5.16 Fuel ageing 12
3.5.17 Hydraulic fluid ageing 12
3.5.18 Tube twisting 12
3.5.19 Fitting/tube rotation torque 13
3.5.20 Stress corrosion 14
3.5.21 Lightning strike 16

Annex A (normative) Equivalent materials and processes 18
