ISO 6858:2017-11 (E)

Aircraft - Ground support electrical supplies - General requirements

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Technical basis 4

5 Electrical characteristics 4
5.1 General 4
5.1.1 Overview 4
5.1.2 Alternating current (AC) power sources 5
5.1.3 Direct current (DC) power sources 5
5.2 Interface connector 6
5.3 Electromagnetic interference 6
5.3.1 Utility interface 6
5.3.2 Aircraft interface 6
5.4 AC steady-state output characteristics 6
5.4.1 General 6
5.4.2 Steady-state AC load characteristics 6
5.4.3 Steady-state AC voltage performance 7
5.5 AC transient characteristics 8
5.5.1 General 8
5.5.2 Transient AC load characteristics 8
5.5.3 Transient AC voltage 8
5.5.4 Transient frequency 9
5.6 DC steady-state output characteristics 9
5.6.1 Steady-state DC load characteristics 9
5.6.2 Steady-state voltage 9
5.6.3 Voltage ripple 9
5.7 DC transient characteristics 9
5.7.1 Transient DC load characteristics (other than engine start-related) 9
5.7.2 Transient DC voltage 9
5.7.3 Engine starting output characteristics 10

6 Electrical protection 10
6.1 General 10
6.2 AC system protection 10
6.2.1 Overvoltage 10
6.2.2 Undervoltage 10
6.2.3 Frequency 10
6.2.4 Overcurrent and short circuits 10
6.2.5 Phase sequence 11
6.2.6 DC content 11
6.2.7 Open neutral/phase conductors 11
6.2.8 Earth/Ground fault 11
6.3 DC system protection 11
6.3.1 Overvoltage 11

6.3.2 Undervoltage 11
6.3.3 Reverse polarity 11
6.3.4 Reverse current 11
6.3.5 Overcurrent and short circuits 12

7 Control circuit and supply 12
7.1 Control circuits 12
7.2 Aircraft interlock supply for AC facilities 12
7.2.1 General 12
7.2.2 Interlock signal characteristics 12
7.2.3 Maintenance mode 12

8 Test requirements 12

9 Safety requirements 13
9.1 General 13
9.2 Mechanical safety features 13
9.2.1 Hot temperatures 13
9.2.2 Fuel tank 13
9.2.3 Exhaust 13
9.2.4 Foreign object ingestion 13
9.2.5 Control panel 13
9.2.6 Ergonomics 13
9.2.7 Fire fighting 13
9.3 Electrical safety features 14
9.3.1 Overload 14
9.3.2 Fault conditions 14
9.3.3 Trip switch 14
9.3.4 Earthing 14
9.3.5 Facility with electrical supply 14
9.4 Features to safeguard personnel 14
9.4.1 General 14
9.4.2 Electrical contact 14
9.4.3 Anti-arcing protection 15
9.4.4 Noise 15
9.4.5 Vibration 15

10 General design features 15
10.1 Environmental conditions 15
10.2 Life expectancy 15
10.3 Manufacturing, service and support features 15
10.3.1 General 15
10.3.2 Material, parts and processes 15
10.3.3 Moisture and fungus resistance 16
10.3.4 Corrosion of metal parts 16
10.3.5 Workmanship 16
10.3.6 Product enclosures 16
10.3.7 Service access for adjustments and repairs 16
10.3.8 Interchangeability and replaceability 16

11 Installation, operation and maintenance 16

12 Labelling 17

Annex A (normative) Acceptable test listing for AC facilities 26

Annex B (normative) Acceptable test listing for DC facilities 32

Bibliography 35
