ISO 17763:2018 (E)

Space systems — Human-life activity support systems and equipment integration in space flight

Contents

Foreword

0 Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Abbreviated terms

5 Application of this document in space programmes

- 5.1 General
- 5.2 Applicability
- 5.3 Specific programme requirements
- 5.4 Monitoring of flight programme conformance according to this document
- 5.5 Verification of programme requirements

6 Matter terrestrial cycle

- 6.1 General
- 6.2 Human life activity support in space flight
- 6.3 Human habitation environment during long-term space missions

7 Basic provisions

- 7.1 Concept of three-level structure of standards
- 7.2 Validity of general techno-medical requirements
- 7.3 Assurance of habitation environment
- 7.4 General techno-medical requirements
- 7.5 Conformance to requirements
- 7.6 Supply and maintenance of a habitation environment
- 7.7 Assurance of conditions for human life activity support

Annex A (informative) The concept of a three-level structure for standards on human-life activity support systems and equipment integration in space flight

- A.1 First level
- A.2 Second level
- A.3 Third level
