

ISO 22893:2022-04 (E)

Space systems - Software product assurance (SPA)

Contents		Page
Foreword	v	
Introduction	vi	
1 Scope	1	
2 Normative references	1	
3 Terms and definitions	1	
4 Software product assurance overview	1	
4.1 General	1	
4.2 Product assurance activities related to software engineering	2	
4.3 Product assurance activities related to software safety and security	2	
4.4 Product assurance activities related to software reliability	2	
5 Software product assurance management	2	
5.1 General	2	
5.2 Software product assurance planning and control	3	
5.3 Risk management	3	
5.4 Supplier selection and monitoring	3	
5.5 Procurement process	3	
5.6 Tools and support environment	4	
5.7 Assessment and improvement process	4	
6 Software process assurance	4	
6.1 General	4	
6.2 Software product assurance related to software engineering processes	4	
6.2.1 General	4	
6.2.2 System requirements analysis process	4	
6.2.3 Software requirement analysis process	5	
6.2.4 Software architectural design process	5	
6.2.5 Software detailed design process	5	
6.2.6 Software construction process	5	
6.2.7 Software testing process	5	
6.2.8 Delivery and acceptance process	6	
6.2.9 Operations process	6	
6.2.10 Maintenance process	6	
6.3 Software product assurance related to support process	6	
6.3.1 General	6	
6.3.2 Documentation process	7	
6.3.3 Safety and security analysis process	7	
6.3.4 Critical items handling process	7	
6.3.5 Configuration management process	7	
6.3.6 Metric process	7	
6.3.7 Verification process	8	
6.3.8 Validation process	8	
6.3.9 Review process	8	
6.3.10 Audit process	8	
6.3.11 Problem resolution process	8	
6.4 Software product assurance related to organizational process	9	
6.4.1 General	9	

6.4.2	Software product assurance related to management process	9
6.4.3	Infrastructure process	9
6.4.4	Training process	9
6.4.5	Reuse process	9
6.4.6	Automatic code generation evaluation process	10
6.4.7	Model-based software engineering process	10
7	Software product quality assurance	10
	Bibliography	11
