ISO 24071:2022-08 (E)

Aircraft - Auto-transformer rectifier units (ATRUs) - General requirements

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 General requirements 1
4.1 Specification sheets 1
4.2 Materials 1
4.2.1 Selection of materials 1
4.2.2 Metal materials 1
4.2.3 Non-metal materials 2
4.3 Design and construction 2
4.3.1 General mechanical and electrical design 2
4.3.2 Electrical design 2
4.3.3 Mechanical design 3
4.4 Size and mass 4
4.5 Colour 4
4.6 Processing quality and appearance quality 4
4.6.1 Processing quality 4
4.6.2 Appearance quality 4
4.7 Markings 4
4.7.1 Components and parts 4
4.7.2 Nameplate of ATRUs 4
4.8 Performance 5
4.8.1 Input power 5
4.8.2 Output power 5
4.8.3 Efficiency 7
4.8.4 Overload 7
4.8.5 Short circuit 7
4.8.6 Soft starting 7
4.8.7 Insulation resistance and dielectric strength 8
4.8.8 Influence on the input power system 8
4.8.9 Electrical protection 8
4.9 Acoustical noise 8
4.10 Reliability 8
4.11 Maintainability 8
4.12 Interchangeability 9

5 Environmental conditions and test procedures 9

6 Qualification inspection 10
6.1 General 10
6.2 Methods of inspection 10
6.2.1 Processing quality and appearance quality 10
6.2.2 Colour 11
6.2.3 Markings 11
6.2.4 Size and mass 11

6.2.5 Insulation resistance and dielectric strength 11
6.2.6 Normal steady-state input voltage 11
6.2.7 Abnormal steady-state input voltage 11
6.2.8 Input voltage spikes 12
6.2.9 Input power interruptions 12
6.2.10 Input frequency transients 12
6.2.11 Output voltage ripple 12
6.2.12 Output voltage frequency characteristics 12
6.2.13 Output voltage distortion factor 12
6.2.14 Output voltage transients 12
6.2.15 Output power interruptions 13
6.2.16 Efficiency 13
6.2.17 Overload 13
6.2.18 Short circuit 13
6.2.19 Soft starting 13
6.2.20 Influence on the input power system 13
6.2.21 Electrical protection 13
6.2.22 Acoustical noise 13
6.2.23 Reliability 13
6.2.24 Maintainability 14
6.2.25 Interchangeability 14
