

ISO 24356:2022-08 (E)

General requirements for tethered unmanned aircraft systems

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	2
5	System general requirements	2
5.1	General requirements	2
5.2	Composition of tUAS	3
5.3	Design for long-duration reliability	3
6	Operator's manual requirements	3
6.1	System performance	3
6.2	Weight limits	4
6.3	Electrical characteristics	4
6.4	Environmental characteristics	4
6.5	Fatigue endurance and life characteristics	5
6.6	Paintings and markings for tUAS safety	5
6.7	Lighting	5
6.8	Others	5
7	Airborne monitoring system	5
7.1	System functions	5
7.2	Monitoring software	6
7.3	Wireless data transmission module	6
8	Propulsion and electrical system	6
8.1	Propulsion system	6
8.2	Electrical system	7
8.2.1	General	7
8.2.2	Airborne electrical system	7
8.2.3	Ground electrical system	8
9	Power transportation system	8
9.1	Tethering cables	8
9.2	Winches	9
9.2.1	Characteristics	9
9.2.2	Environment adaptability, protection and connectors	9
9.2.3	Functional elements	10
10	Remote pilot station	10
11	Test verification	10
11.1	General	10
11.2	Test purposes	11
11.3	Test contents	11
