## Space systems - Micro-vibration testing

---

| <b>Contents</b>    |  | <b>Page</b> |
|--------------------|--|-------------|
| Foreword .....     |  | v           |
| Introduction ..... |  | vi          |
| 1                  | Scope .....  | 1           |
| 2                  | Normative references .....   | 1           |
| 3                  | Terms and definitions .....  | 1           |
| 4                  | Symbols and abbreviated terms .....  | 2           |
| 5                  | Test purpose .....   | 2           |
| 6                  | General test information .....   | 3           |
| 6.1                | Tailoring .....  | 3           |
| 6.2                | Disturbance sources .....  | 3           |
| 6.3                | Preliminary analysis .....   | 3           |
| 7                  | Test equipment .....   | 3           |
| 7.1                | Test configuration for transfer function measurement and modal survey test ..... | 3           |
| 7.2                | Test configuration for response measurement .....                                | 4           |
| 7.3                | Test equipment functional requirements and recommendations .....                 | 5           |
| 7.3.1              | Boundary simulation .....  | 5           |
| 7.3.2              | Excitation .....   | 7           |
| 7.3.3              | Measurement, data acquisition and processing .....                               | 7           |
| 8                  | Test requirements and recommendations .....                                      | 8           |
| 8.1                | General test requirements and recommendations .....                              | 8           |
| 8.1.1              | General .....  | 8           |
| 8.1.2              | Transfer function measurement .....  | 9           |
| 8.1.3              | Modal survey test .....  | 9           |
| 8.1.4              | Micro-vibration response measurement .....                                       | 9           |
| 8.2                | Pre-conditions .....   | 9           |
| 8.3                | Test article configuration .....   | 9           |
| 8.4                | Test environment .....   | 10          |
| 8.4.1              | Laboratory environment requirements .....  | 10          |
| 8.4.2              | Background noise requirements .....  | 10          |
| 8.5                | Measurement .....  | 10          |
| 8.6                | Safety .....   | 10          |
| 9                  | Test flow and procedure .....  | 11          |
| 9.1                | Test flow .....  | 11          |
| 9.2                | Test procedure .....   | 11          |
| 9.2.1              | General .....  | 11          |
| 9.2.2              | Before the test .....  | 12          |
| 9.2.3              | Test implementation .....  | 12          |
| 9.2.4              | After the test .....   | 14          |
| 10                 | Test interruption and handling .....   | 14          |
| 10.1               | Test interruption .....  | 14          |
| 10.2               | Interruption handling .....  | 14          |

|  |  |           |
|--|--|-----------|
| <b>11</b>  | <b>Test data and result evaluation .....</b> | <b>14</b> |
| <b>11.1</b>  | <b>Test data .....</b>                       | <b>14</b> |
| <b>11.2</b>  | <b>Result evaluation .....</b>               | <b>15</b> |
| <b>12</b>  | <b>Test report .....</b>                     | <b>15</b> |
| <b>Annex A (informative) Typical internal disturbance sources and characteristics .....</b>            |  | <b>16</b> |
| <b>Annex B (informative) Guideline of the necessity of spacecraft level micro-vibration test .....</b> |  | <b>17</b> |
| <b>Annex C (informative) Suspension frequencies measurement .....</b>                                  |  | <b>18</b> |
| <b>Bibliography .....</b>  |  | <b>22</b> |
