

ISO 21350:2023-04 (E)

Space systems - Off-the-shelf item utilization

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Requirements	2
4.1	Responsibilities	2
4.2	Tailoring	2
5	Policy	2
5.1	Evaluation of the OTS item design	2
5.1.1	General	2
5.1.2	OTS item requirements	2
5.1.3	OTS item evaluation	2
5.2	Rules in a critical application of OTS	3
5.2.1	Operational boundaries	3
5.2.2	Design evaluation	3
5.2.3	OTS item modifications	3
5.2.4	Qualification requirements	3
6	Precautions and warning notes	4
6.1	Notes about product heritage of OTS item	4
6.1.1	OTS product heritage	4
6.1.2	Application of OTS item design/manufacturing practices	4
6.1.3	OTS item design margins	4
6.2	Acquisition of OTS items	4
6.2.1	General	4
6.2.2	Specification	4
6.2.3	Space environment	4
6.2.4	Configuration control	4
6.2.5	Acceptance testing	4
6.2.6	Maintenance	5
6.3	Management of modified OTS item	5
6.3.1	Purchasing	5
6.3.2	Qualification	5
6.4	Programmatic decision to use an OTS item	5
6.4.1	Functional/technical capability	5
6.4.2	Interface definition	5
6.4.3	Modification versus heritage	5
7	Decision logic for OTS item usage	5
8	Procedure	6
8.1	Categorizing of available OTS items	6
8.2	Considering a good candidate for selection	6
8.3	Compromise of discrepancies between an OTS item and project requirements	6
8.4	Satisfying the OTS item's requirements	6

8.4.1	Qualification plan	6
8.4.2	Categorization	6
8.4.3	Combining the parameters	7
Annex A (informative) A decision logic for OTS item utilization		8
Annex B (normative) Requirement list for OTS item utilization		12
Annex C (informative) OTS item application categories		14
Bibliography		15
