

ISO 5332:2023-10 (E)

Civil small and light unmanned aircraft systems (UAS) under low-pressure conditions - Test methods

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Test description	1
4.1 General.....	1
4.2 Test conditions.....	1
4.2.1 Standard atmospheric conditions.....	1
4.2.2 Test with low temperature and low air pressure.....	2
4.2.3 Test with high temperature and low air pressure.....	2
4.2.4 Allowed deviation.....	3
4.2.5 Duration of exposure.....	3
4.2.6 Rate of temperature change.....	3
4.2.7 Rate of pressure change.....	3
4.3 Test article.....	3
4.4 Test apparatus.....	3
5 Test procedures	3
5.1 Preconditioning.....	3
5.2 Inspection before tests.....	4
5.3 Conditioning.....	4
5.4 Recovery.....	4
5.5 Inspection after tests.....	4
6 Test interruption and recovery	4
6.1 Interruption due to test chamber malfunction.....	4
6.2 Interruption due to test article operation failure.....	4
7 Test report	4
Annex A (Informative) Functional items that can be checked in the test chamber	6
Annex B (Informative) Example table for test result record	7
Bibliography	8
