

ISO/TS 6434:2024-01 (E)

Space systems - Design, testing and operation of a large constellation of spacecraft

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative reference		1
3 Terms and definitions		1
4 Abbreviated terms		2
5 Requirements		2
5.1 Mission design.....		2
5.1.1 Orbit selection of constellation and maintenance to minimise collision risk.....		2
5.1.2 Intra-constellation collision avoidance.....		2
5.1.3 Space debris mitigation.....		3
5.1.4 Selection of launch service providers.....		3
5.1.5 Assessment on the long-term evolution of debris environment.....		3
5.2 Spacecraft design.....		3
5.2.1 Reliability design.....		3
5.2.2 Design to support collision avoidance.....		5
5.2.3 Space debris mitigation design.....		5
5.2.4 Design to support successful disposal.....		5
5.2.5 Safe re-entry.....		5
5.2.6 Large constellation radio frequency interference mitigation.....		5
5.2.7 Large constellation minimization of disruptive visual brightness.....		6
5.3 Qualification and testing.....		6
5.3.1 Verification and validation based upon established standards and procedures.....		6
5.3.2 Test and checkout before to injecting into the planned orbit.....		6
5.4 Operations and collision avoidance.....		6
5.4.1 Quality and reliability control during operation.....		6
5.4.2 Conjunction assessment and collision avoidance.....		7
5.4.3 Large constellation Radio frequency interference mitigating operation.....		8
5.4.4 Large constellation operation to minimise disruptive visual brightness.....		8
5.5 Disposal of spacecraft.....		8
5.5.1 Post-mission disposal.....		8
5.5.2 Criteria for initiating disposal.....		8
5.5.3 Determination of mission extension or termination.....		8
5.5.4 Disposal upon decommissioning.....		8
5.5.5 Spacecraft passivation.....		9
5.5.6 Active debris removal in operations.....		9
Bibliography		10
