

ISO/TS 6434:2024-01 (E)

Space systems - Design, testing and operation of a large constellation of spacecraft

Contents		Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative reference	1
3 Terms and definitions	1
4 Abbreviated terms	2
5 Requirements	2
5.1 Mission design	2
5.1.1 Orbit selection of constellation and maintenance to minimise collision risk	2
5.1.2 Intra-constellation collision avoidance	2
5.1.3 Space debris mitigation	3
5.1.4 Selection of launch service providers	3
5.1.5 Assessment on the long-term evolution of debris environment	3
5.2 Spacecraft design	3
5.2.1 Reliability design	3
5.2.2 Design to support collision avoidance	5
5.2.3 Space debris mitigation design	5
5.2.4 Design to support successful disposal	5
5.2.5 Safe re-entry	5
5.2.6 Large constellation radio frequency interference mitigation	5
5.2.7 Large constellation minimization of disruptive visual brightness	6
5.3 Qualification and testing	6
5.3.1 Verification and validation based upon established standards and procedures	6
5.3.2 Test and checkout before to injecting into the planned orbit	6
5.4 Operations and collision avoidance	6
5.4.1 Quality and reliability control during operation	6
5.4.2 Conjunction assessment and collision avoidance	7
5.4.3 Large constellation Radio frequency interference mitigating operation	8
5.4.4 Large constellation operation to minimise disruptive visual brightness	8
5.5 Disposal of spacecraft	8
5.5.1 Post-mission disposal	8
5.5.2 Criteria for initiating disposal	8
5.5.3 Determination of mission extension or termination	8
5.5.4 Disposal upon decommissioning	8
5.5.5 Spacecraft passivation	9
5.5.6 Active debris removal in operations	9
Bibliography	10
