ISO/TR 23689:2024-06 (E)

Space environment (natural and artificial) - Space weather information for use in space systems operations

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Space weather **2**
4.1 Origin of space weather concept 2
4.2 Concept of space weather 3
4.3 Space weather factors 3
4.4 Space weather impacts on the near-Earth space 3
4.5 Space weather domains 3
4.6 Space weather information 3
4.7 Space weather operational models 3
4.8 Space weather time frames 3

5 Time frames for space weather information **4**
5.1 Historical 4
5.2 Current epoch (Nowcast) 4
5.3 Forecast 4

6 Galactic cosmic rays **4**

7 Solar environment within the heliosphere **4**
7.1 Solar dynamo 4
7.1.1 Phenomenology 4
7.2 Solar environment 4
7.2.1 Phenomenology 4
7.2.2 Effects 6
7.3 Sunspots 6
7.3.1 Phenomenology 6
7.3.2 History of discovery, long-term record 7
7.3.3 Variability 7
7.3.4 Effects 7
7.4 Solar shorter wavelength electromagnetic radiation 7
7.4.1 Phenomenology 7
7.4.2 Ranges of electromagnetic radiation with the shortest wavelength 8
7.4.3 Effects 8
7.5 Solar longer wavelength electromagnetic radiation 8
7.5.1 Phenomenology 8
7.5.2 Ranges of short-wave electromagnetic radiation in the longer wavelength range 8
7.5.3 Effects 9
7.6 Solar energetic particles 9
7.6.1 Phenomenology 9
7.6.2 Solar particle events 9
7.6.3 Effects 9

8 Solar event effects on the near-Earth environment **9**
8.1 Magnetosphere 9
8.1.1 Phenomenology 9
8.1.2 Magnetospheric magnetic field 10

Magnetospheric magnetic field
8.1.3 Trapping 10
8.1.4 Geomagnetic storms 10
8.1.5 Magnetospheric substorms 10
8.1.6 Effects 11
8.2 Plasmasphere 11
8.2.1 Phenomenology 11
8.2.2 Geo corona 11
8.2.3 Dynamics 11
8.2.4 Effects 11
8.3 Van Allen radiation belts 12
8.3.1 Phenomenology 12
8.3.2 Outer radiation belt 12
8.3.3 Inner radiation belt 12
8.3.4 Ring current 12
8.3.5 Other radiation belt variability 12
8.3.6 South Atlantic Anomaly 13
8.3.7 Effects 13
8.4 Polar region and high-latitude magnetosphere 14
8.4.1 Phenomenology 14
8.4.2 Auroral oval 14
8.4.3 Polar cap 14
8.4.4 Field aligned currents and auroral electrojets 14
8.4.5 Effects 14
8.5 Geomagnetic cut-off 14
8.5.1 Phenomenology 14
8.5.2 Cut-off rigidity 14
8.5.3 Effects 15

9 Terrestrial environment 15
9.1 Neutral atmosphere 15
9.1.1 Phenomenology 15
9.1.2 Atmospheric layers 15
9.1.3 Effects 16
9.2 Ionosphere 16
9.2.1 Phenomenology 16
9.2.2 Ionospheric layers 16
9.2.3 Ionospheric storm 17
9.2.4 Effects 17

10 Micrometeoroid and debris environment 18
10.1 Phenomenology 18
10.2 Natural 18
10.3 Artificial 18

Annex A (informative) **Space weather indices 19**

Annex B (informative) **Online space weather glossaries 27**
