DIN EN 9300-100:2026-06 (E)

Aerospace series - LOTAR LOng-Term Archiving and Retrieval of digital technical product documentation such as 3D, CAD and PDM data - Part 100: Common concepts for long-term archiving and retrieval of 3D mechanical CAD information; English version EN 9300-100:2026

European foreword 5
Introduction 7
1 Scope 8
1.1 Introduction 8
1.2 In Scope 8
1.3 Out of scope 8
2 Normative references 8
3 Terms, definitions and abbreviations 9
4 Applicability 9
5 Fundamentals and concepts for long-term archiving of 3D mechanical CAD information 9
5.1 General 9
5.2 CAD essential information: dependencies on the CAD methods used 11
5.3 Dependency of CAD essential information on use case 12
5.4 Use cases shared by different aerospace communities 13
5.5 Long-term archiving and retrieval of CAD as part of the company risk management 14
5.6 CAD reference model for long-term archiving of design intent 16
5.7 Long-term archiving of CAD and the maturity of related technologies 17
5.8 Archiving of several files for the same CAD model 18
6 Document structure of EN 9300-1XX series 18
6.1 General 18
6.2 Link with other EN 9300 parts 19
6.2.1 Link between parts EN 9300-1XX for fundamental and concepts 19
6.2.2 Relationship/linking between the EN 9300-1XX series 19
7 Qualification methods for long term preservation of archived CAD information 20
7.1 General 20
7.2 Specific qualification processes for long term archiving of CAD models and associated tolerance thresholds 21
7.2.1 General 21
7.2.2 Methods of qualification based on computation of continuous values, requiring tolerance threshold(s) 22
7.3 Categorization of CAD archived files according to a risk management analysis 22
7.4 Repair in case of identification of errors after retrieval 23
8 Preservation planning of archived CAD information 24

8.1 General ... 24
8.2 Evolution of CAD systems and other related applications (3D viewers) ... 25
8.3 Creation of new validation properties and verification rules ... 25
8.4 Evolution of standards and the related relevant recommended practices ... 25
8.5 Evolution of business requirements ... 26
8.6 Review of the preservation planning policy ... 26
9 Administration and monitoring ... 26
10 Definition of archive information packages for CAD data ... 27
10.1 General ... 27
10.2 Content information ... 28
10.3 Preservation Description Information (PDI) ... 28
10.3.1 General ... 28
10.3.2 Reference information ... 29
10.3.3 Context information ... 29
10.3.4 Provenance information ... 30
10.3.5 Fixity information ... 30
10.3.6 Application of PDI data for LTA of 3D CAD ... 31
10.4 Packaging information ... 32
10.5 Descriptive information ... 32
Annex A (informative) The progression of content within CAD systems ... 34
Annex B (informative) Template for the table of contents of a part of the EN 9300-1XX series ... 35
Annex C (informative) Considerations for long-term preservation of CAD 3D information ... 36
C.1 General ... 36
C.2 Precision of CAD mechanical systems and CAD generation ... 36
C.3 Tolerance of design versus tolerance of the CAD geometric modeller ... 37
C.4 Tolerances to control the long-term preservation of essential information of CAD 3D models ... 38
C.5 Different levels of information of CAD 3D shape representation ... 39
C.6 Quality of CAD geometry ... 40
C.7 CAD models used as the reference after the release of the design ... 42
C.8 Use of native CAD models in conjunction with STEP CAD archived models during the aerospace product life cycle ... 43
C.9 Long-term archiving formats for 3D CAD information ... 43
Annex D (informative) Definition of a representative sample of test cases ... 45
D.1 General ... 45
D.2 Units tests cases ... 46
D.3 Operational tests cases ... 47

Annex E (informative) Examples of performance indicators used to manage longevity of CAD archived information **48**

Annex F (informative) Maturity of the main components for long-term archiving of CAD mechanical information **51**

Annex G (informative) Acronyms **52**

Bibliography **53**
