|------------------------------------------------------------------------------|-----------|
| Foreword.....                                                                | iv        |
| Introduction .....                                                           | v         |
| <b>1 Scope .....</b>                                                         | <b>1</b>  |
| <b>2 Normative references .....</b>                                          | <b>1</b>  |
| <b>3 Terms and definitions .....</b>                                         | <b>1</b>  |
| <b>4 List of hazards .....</b>                                               | <b>2</b>  |
| <b>5 Safety requirements and/or protective risk reduction measures .....</b> | <b>2</b>  |
| 5.1 General .....                                                            | 2         |
| 5.2 Vibration reduction .....                                                | 2         |
| 5.3 Quantities to be measured .....                                          | 3         |
| 5.4 Instrumentation .....                                                    | 3         |
| 5.4.1 General .....                                                          | 3         |
| 5.4.2 Transducers .....                                                      | 3         |
| 5.4.3 Frequency weighting .....                                              | 4         |
| 5.4.4 Integration time .....                                                 | 4         |
| 5.4.5 Speed .....                                                            | 4         |
| 5.5 Measurement location .....                                               | 4         |
| 5.6 Set up and equipment .....                                               | 4         |
| 5.6.1 Test track .....                                                       | 4         |
| 5.6.2 Equipment and condition of the GSE .....                               | 6         |
| 5.6.3 Drivers .....                                                          | 6         |
| 5.6.4 Environmental parameter .....                                          | 6         |
| 5.7 Measurement procedure and validity .....                                 | 6         |
| 5.7.1 Speed .....                                                            | 6         |
| 5.7.2 Test procedure .....                                                   | 7         |
| 5.7.3 Validity of test .....                                                 | 7         |
| 5.7.4 Coefficient of variation .....                                         | 7         |
| 5.7.5 Reported vibration values .....                                        | 7         |
| 5.8 Test report .....                                                        | 8         |
| 5.9 Declaration of vibration emission values .....                           | 8         |
| <b>6 Verification of the safety requirements .....</b>                       | <b>9</b>  |
| <b>7 Information for use .....</b>                                           | <b>9</b>  |
| <b>Annex A (informative) List of significant hazards .....</b>               | <b>10</b> |
| <b>Annex B (informative) Guidance for reporting vibration data .....</b>     | <b>11</b> |
| <b>Bibliography .....</b>                                                    | <b>12</b> |
