DIN EN 14777:2005-10 (E)

Space engineering - Multipaction design and test; English version EN 14777:2004

Inhalt

Seite

Foreword 5

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms, definitions and abbreviated terms 8
3.1 Terms and definitions 8
3.2 Abbreviated terms 10

4 Verification 10
4.1 Verification process 10
4.2 Verification levels 11
4.3 Verification plan 11
4.3.1 Introduction 11
4.3.2 Generation and updating 11
4.3.3 Description 11
4.4 Verification routes 12
4.5 Classification of component type 12
4.6 Single carrier 13
4.6.1 General 13
4.6.2 Margins 13
4.6.3 Route to demonstrate conformance 14
4.7 Multi-carrier 16
4.7.1 General 16
4.7.2 Threshold above equivalent CW peak power 16
4.7.3 Threshold below equivalent CW peak power 16
4.7.4 Route to demonstrate conformance 17

5 Design analyses 19
5.1 General 19
5.2 Field analysis 19
5.3 Critical region identification 19
5.4 Multipaction sensitivity analysis 20
5.5 Venting analysis 21
5.6 Inspection 21

6 Test conditions 21
6.1 Cleanliness 21
6.2 Pressure 21
6.3 Temperature 21
6.4 Frequencies 22
6.5 Pulse duration 22
6.5.1 General 22
6.5.2 CW units 22
6.5.3 Pulse units 23
6.6 Electron seeding 23
6.6.1 CW test 23
6.6.2 Pulsed test 23
6.6.3 Multi-carrier test 23
6.6.4 Seeding sources 23

7 Methods of detection 24
7.1 General 24

7.2 Detection methods 24
7.3 Detection method parameters 24
7.3.1 Sensitivity 24
7.3.2 Rise time 25

8 Test procedures 25
8.1 Test configurations 25
8.2 Test facility validation 25
8.3 Test execution 26
8.3.1 General 26
8.3.2 Test procedure 26
8.4 Acceptance criteria 27
8.4.1 General 27
8.4.2 Multi-carrier test 27

Annex A (informative) Multipaction background 28
A.1 Physics of multipaction 28
A.2 Other physical processes 29
A.3 RF operating environment 29
A.4 Parallel plate multipaction 35
A.5 Coaxial line multipaction 40

Annex B (informative) Component venting 43
B.1 Introduction 43
B.2 Discharge dependence on pressure 43
B.3 Test example 43
B.4 Venting dimensions 44
B.5 Venting hole calculations 44
B.6 Payload vacuum 44
B.7 Venting model used 44
B.8 Pumping conductance of a venting hole 45
B.9 Ultimate pressure 46
B.10 Venting experiment 48
B.11 Venting guidelines 48

Annex C (normative) Cleaning, handling, storage and contamination 50
C.1 Generic processes 50
C.2 Cleaning, handling and storage 50
C.3 Contaminants 52

Annex D (normative) Electron seeding 55
D.1 Introduction 55
D.2 CW test 55
D.3 Pulsed test 55
D.4 Multi-carrier test 55
D.5 Types of seeding source 57

Annex E (informative) Test methods 58
E.1 Introduction 58
E.2 General test methods 58
E.3 Transient tests methods 62
E.4 Test facility validation 69

Bibliography 70

Figures

Figure 1 — Routes to conformance for single carrier 15

Figure 2 — Routes to conformance for multi-carrier case 18

Figure 3 — The susceptibility zone boundaries for aluminium, copper, silver, gold and alodine 1200 20

Figure A.1 — Total secondary electron emission as a function of energy of the incident electron 36

Figure A.2 — Multipaction susceptibility zones for parallel plates of aluminum..37

Figure A.3 — Multipaction thresholds for all materials studied, plotted in a single graph as labeled 42

Figure B.1 — The basic venting model 45

Figure E.1 — Generic close to carrier noise multipaction test site 59

Figure E.2 — Principal multipaction test set-up for nulling detection method...61

Figure E.3 — Test configuration (mode 1) 63

Figure E.4 — Test configuration (mode 2) 64

Figure E.5 — Detected envelope of a five carrier waveform...66

Figure E.6 — Charge probe 68

Tables

Table A.1 — Worst case mode order for susceptible gaps for gold..31

Table A.2 — Worst case mode order for susceptible gaps for silver 32

Table A.3 — Worst case mode order for susceptible gaps for aluminium 33

Table A.4 — Worst case mode order for susceptible gaps for alodine...34

Table A.5 — Worst case mode order for susceptible gaps for copper 35

Table A.6 — Constants for the most used materials...40

Table A.7 — Critical voltages for multipaction in 50 Ω coaxial lines 41

Table B.1 — Outgassing rate for space components used in space applications..46
