

DIN EN 12954:2020-02 (E)

General principles of cathodic protection of buried or immersed onshore metallic structures

Contents		Page
European foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	7
4	Abbreviations and symbols	13
5	Cathodic protection personnel competence	13
6	Principles and criteria of cathodic protection	14
6.1	Principles of cathodic protection	14
6.2	Cathodic protection criteria	14
Table 1 -- Free corrosion potentials, protection potentials and limiting critical potentials of common metallic materials in soils and waters (except seawater and brackish water) measured against CSE		15
6.3	Alternative method	16
6.3.1	100 mV cathodic potential shift	16
6.3.2	Other methods	17
6.4	Criteria in presence of a.c	17
7	Prerequisites for application of cathodic protection	17
7.1	General	17
7.2	Electrical continuity	17
7.3	Electrical isolation	17
7.4	External coating	18
8	Useful data and design considerations	18
8.1	General	18
8.2	Structure details	19
8.3	Service conditions	19
9	Design	20
9.1	General	20
9.2	Design lifetime	20
9.3	Adjacent structures and external electrical sources	20
9.4	Electrical continuity/discontinuity	20
9.5	Protective coatings	21
9.6	Current demand	21
9.7	Galvanic anode systems	22
9.7.1	General considerations	22
9.7.2	Utilization of galvanic anode systems	22
9.7.3	Design of a galvanic anode system	22
9.7.4	Technical considerations and data for the design of a galvanic protection system	23
Table 2 -- Typical chemical compositions of the alloys used for zinc anodes		24

Table 3 -- Typical electrochemical parameters for zinc anodes used in soils	25
Table 4 -- Typical chemical compositions of the alloys used for magnesium anodes	25
Table 5 -- Typical electrochemical parameters for magnesium anodes used in soils	26
Figure 1 -- Current capacity of magnesium alloy versus current density [9]	27
9.8 A.C. and/or d.c. decoupling devices	28
9.9 Impressed current cathodic protection (ICCP) system	28
9.10 Monitoring	29
9.11 Cable	29
9.12 Impressed current groundbeds	30
10 Installation of cathodic protection systems	31
11 Commissioning	31
11.1 General	31
11.2 Preliminary checking	31
11.3 Start-up	32
11.4 Assessment of the cathodic protection effectiveness	32
11.5 Documentations	33
12 Monitoring, inspection and maintenance	33
12.1 General	33
12.2 Monitoring	34
12.3 Inspection	35
12.4 Maintenance	35
Annex A (informative) Corrosion likelihood in soils	36
Annex B (informative) Reduction of the corrosion rate by using a 100 mV cathodic polarization -- 100 mV cathodic potential shift	38
B.1 Measurement method during polarization	38
Figure B.1 -- Polarization formation method	38
B.2 Measurement method during depolarization	39
Figure B.2 -- Polarization decay method	39
