DIN EN 1159-3:2008-06 (E)

Advanced technical ceramics - Ceramic composites, thermophysical properties - Part 3: Determinati on of specific heat capacity (includes Corrigendum AC:2008)

Contents

Page

Foreword ... 3

1 Scope ... 4

2 Normative references ... 4

3 Terms and definitions ... 4

4 Method A - Drop calorimetry ... 5
4.1 Principle ... 5
4.2 Apparatus ... 5
4.3 Standard reference materials ... 5
4.4 Test specimens ... 5
4.5 Calibration of calorimeter ... 5
4.5.1 General ... 5
4.5.2 Electrical Calibration ... 6
4.5.3 Calibration using standard reference material ... 6
4.6 Test procedures ... 6
4.6.1 Test without a crucible ... 6
4.6.2 Test with a crucible ... 6
4.6.3 Description of test ... 7
4.7 Calculations ... 7
4.7.1 General ... 7
4.7.2 Determination of the calorimetric calibration factor ... 8
4.7.3 Determination of mean specific heat capacity pC ... 8

5 Method B - Differential scanning calorimetry ... 9
5.1 Principle ... 9
5.1.1 General ... 9
5.1.2 Stepwise heating method ... 9
5.1.3 Continuous heating method ... 9
5.2 Apparatus ... 10
5.2.1 Differential scanning calorimeter ... 10
5.3 Standard reference materials, SRM ... 10
5.4 Test specimens ... 10
5.5 Temperature calibration ... 10
5.6 Test procedure for the determination of Cp ... 11
5.6.1 General ... 11
5.6.2 Method 1: Measurements requiring the knowledge of the K factor ... 11
5.6.3 Method 2: Measurements requiring the use of a reference standard material (SRM) ... 12
5.7 Calculation of results ... 13
5.7.1 Method requiring the knowledge of the K factor ... 13
5.7.2 Method using an SRM ... 14

6 Test report ... 16

Annex A (normative) Drop calorimetry - Determination of the calibration factor using standard reference material ... 19

Annex B (informative) Standard reference material ... 20

Annex C (informative) Materials for calorimeter calibrations ... 25

Bibliography ... 26
