ISO 18213-1:2007-11 (E)

Nuclear fuel technology - Tank calibration and volume determination for nuclear materials accountancy - Part 1: Procedu ral overview

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Physical principles involved 1

3 The calibration model 2

4 Equipment required 3
4.1 General 3
4.2 The tank and its measurement systems 3
4.3 Prover system 6
4.4 Calibration liquid 8
4.5 Calibration software 8

5 A typical tank calibration procedure 8
5.1 Calibration procedure 8
5.2 Procedural notes 9

6 Calibration planning and pre-calibration activities 10
6.1 The calibration plan 10
6.2 Measurement requirements and preliminary error analysis 10
6.3 The tank and its measurement support systems 11
6.4 Calibration equipment (prover system) 12
6.5 Reference operating conditions 13
6.6 Data acquisition and analysis 15
6.7 The calibration plan 17

7 Volume determination 18
7.1 Overview 18
7.2 Steps for determining reference height 18
7.3 Steps for determining volume 19
7.4 Compute uncertainty estimates 20
7.5 Final note on heel volume 21

Bibliography 22
