ISO 18213-2:2007-11 (E)

Nuclear fuel technology - Tank calibration and volume determination for nuclear materials accoun tancy - Part 2: Data standardization for tank calibration

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Physical principles 1

3 Data required 1

4 Calibration data 3
4.1 General 3
4.2 Liquid height 5
4.3 Volume 6

5 Dimensional changes in the tank 7
5.1 Thermodynamic basis 7
5.2 Volume 8
5.3 Height 8

6 Multiple calibration runs 8
6.1 Notation 8
6.2 Heel volume 8
6.3 Run alignment 9

7 Results -- Standardized calibration data 9

Annex A (informative) Density of water 10

Annex B (informative) Buoyancy corrections for mass determination 11

Annex C (informative) Determination of tank heel volume 12

Annex D (informative) Statistical method for aligning data from several calibration runs 14
