ISO 22889:2007-12 (E)

Metallic materials - Method of test for the determination of resistance to stable crack extension using specimens of low constr aint

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 2

3 Terms and definitions 2

4 Symbols 3

5 General requirements 4
5.1 Introduction 4
5.2 Test specimens 4
5.3 Pre-test requirements 6
5.4 Test apparatus 7
5.5 Test requirements 8
5.6 Post-test crack measurements 9

6 Determination of 5 - a resistance curve and CTOA 11
6.1 General 11
6.2 Test procedure 11
6.3 R-curve plot 12
6.4 Critical CTOA determination 13

7 Test report 13
7.1 General 13
7.2 Specimen, material and test environment 14
7.3 Test data qualification 14
7.4 Qualification of the 5 R-Curve 16
7.5 Qualification of c 16

Annex A (informative) Examples of test reports 28

Annex B (informative) Apparatus for measurement of crack opening displacement, 5 33

Annex C (informative) Determination of the crack tip opening angle, ... 35

Annex D (informative) Determination of point values of fracture toughness 45

Bibliography 48
