|--|---|-------------|
| Foreword .....   |   | 3           |
| Introduction .....   |   | 4           |
| 1  | Scope .....                               | 5           |
| 2  | Normative references .....                | 5           |
| 3  | Principle .....                           | 5           |
| 4  | Environmental parameters .....            | 6           |
| 5  | Humidity and temperature parameters ..... | 6           |
| 5.1  | Relative humidity .....                   | 6           |
| 5.2  | Temperature .....                         | 6           |
| 5.3  | Temperature-humidity complex .....        | 6           |
| 6  | Airborne gas contaminants .....           | 7           |
| 6.1  | Principle .....                           | 7           |
| 6.2  | Placing of measuring equipment .....      | 7           |
| 6.3  | Measuring methods and duration .....      | 7           |
| 7  | Airborne particle contaminants .....      | 10          |
| 7.1  | Principle .....                           | 10          |
| 7.2  | Volumetric measurements .....             | 10          |
| 7.3  | Measurement of particle deposits .....    | 11          |
| Annex A (informative) Reagents used for both passive and active samplers ..... |   | 12          |
| Bibliography .....   |   | 14          |
