

DIN EN ISO 16784-1:2008-07 (E)

Corrosion of meta ls and alloys - Corrosion and fouling in industrial cooling water systems - Part 1: Guidelines for conducting pilot-scale evaluation of corrosion and fouling control additives for open recirculating cooling water systems (ISO 16784-1:2006)

Contents		Page
Foreword		3
Introduction		4
1	Scope	5
2	Normative references	5
3	Terms, definitions, symbols and abbreviated terms	6
4	Types of testing	6
4.1	Laboratory and off-site testing	6
4.2	On-site testing	6
4.3	On-line testing	6
5	Test unit design parameters	7
5.1	General	7
5.2	Construction materials	7
6	Operating parameters	9
6.1	General	9
6.2	Surface temperature	9
6.3	Water velocity	9
6.4	Residence time	9
7	Water quality	9
7.1	General	9
7.2	Natural versus synthetic water supplies	10
7.3	Fresh water	10
7.4	Seawater and brackish water	10
7.5	Recycle/reuse water	10
7.6	Dual and combined make-up systems	10
8	Contamination	11
8.1	General	11
8.2	Process leaks	11
8.3	Biological matter	11
8.4	Airborne solids and gases	11
9	Parameters to be evaluated in pilot test units	11
9.1	Corrosion	11
9.2	Fouling	13
9.3	Practical problems in operating systems -- Multiple combinations of problems	14
9.4	Water treatment additives	14
10	Design of pilot-scale performance testing facilities	15
10.1	Objectives	15
10.2	The importance of simulating specific application environments	15

10.3	Compromises in pilot-scale performance testing	15
11	Pilot-scale facility operations	17
11.1	Documentation of design	17
11.2	Repeatability of results and comparison with field performance	17
11.3	Record-keeping and reports	17
	Bibliography	18
