# ISO 27831-2:2008-10 (E)

## Metallic and other inorganic coatings - Cleaning and preparation of metal surfaces - Part 2: Non-ferrous metals and alloys

## Contents

Page

Foreword ..... vii

Introduction ..... viii

1 Scope ..... 1

2 Normative references ..... 2

3 Terms and definitions ..... 3

4 Essential information to be supplied by the purchaser to the processor ..... 3

5 Requirements ..... 4

6 Standard cleaning methods ..... 5

7 Non-corrosion-resisting steels, cast irons and pure irons ..... 5

8 Corrosion-resisting and heat-resisting steels ..... 6

9 Pretreatment of metals prior to powder coating ..... 6

10 Cleaning and preparation processes ..... 6
11 Aluminium and aluminium alloys ..... 6
11.1 General ..... 6
11.2 General degreasing and cleaning ..... 6
11.3 Removal of corrosion products ..... 6
11.4 Preparation prior to anodizing ..... 7
11.5 Preparation prior to oxide removal treatment (process O) or filming treatment ..... 7
11.6 Preparation prior to adhesive bonding of unanodized items ..... 7
11.7 Preparation prior to electroplating ..... 7
11.8 Preparation prior to autocatalytic nickel plating ..... 7
11.9 Preparation prior to conversion coating ..... 7
11.10 Preparation prior to metal spraying ..... 7
11.11 Preparation prior to vitreous enamelling ..... 8
11.11.1 Sheet, extrusions and items made from casting alloys ..... 8
11.11.2 Other castings ..... 8
11.12 Preparation prior to supplementary treatments on physically vapour deposited aluminium ..... 8
12 Copper and copper alloys ..... 8
12.1 General degreasing and cleaning ..... 8
12.2 Preparation prior to electroplating ..... 9
12.3 Preparation prior to autocatalytic nickel plating ..... 9
12.4 Preparation prior to hot tinning (TRI process) ..... 10
12.5 Preparation prior to vitreous tinning ..... 10
13 Nickel alloys ..... 10
13.1 General degreasing and cleaning ..... 10
13.2 Preparation prior to electroplating ..... 10
13.3 Preparation prior to autocatalytic deposition ..... 11
13.4 Preparation prior to vitreous enamelling ..... 11
14 Titanium and titanium alloys ..... 11

14.1 General degreasing and cleaning ..... 11
14.2 Preparation prior to electroplating ..... 12
14.3 Preparation prior to autocatalytic nickel plating ..... 12
15 Magnesium alloys ..... 12
15.1 General degreasing and cleaning prior to electroplating and conversion coating ..... 12
15.2 Preparation prior to electroplating ..... 12
15.3 Preparation prior to conversion coating ..... 13
15.3.1 General ..... 13
15.3.2 As-cast castings ..... 13
15.3.3 Machined castings ..... 14
15.3.4 Forgings ..... 14
15.3.5 Sheets and extrusions ..... 14
16 Zinc-based alloys ..... 14
16.1 General degreasing and cleaning ..... 14
16.2 Cleaning of corroded items ..... 14
16.3 Preparation of zinc alloy die castings prior to electroplating ..... 14
16.4 Preparation of zinc alloy castings prior to chromate conversion coating or phosphate treatment ..... 14
17 Tin and its alloys ..... 14
18 Tungsten alloys ..... 15
18.1 Preparation prior to electroplating ..... 15
18.2 Preparation prior to adhesive bonding ..... 15
19 Lead and its alloys ..... 15

20 Zinc-, cadmium-, chromium- and gold-coated items ..... 15
20.1 Preparation of zinc-coated items prior to chromate conversion coating ..... 15
20.2 Preparation of cadmium-coated items prior to chromate conversion coating ..... 15
20.3 Preparation of physically vapour deposited cadmium prior to supplementary treatments 15
20.4 Preparation for chromium-coated parts prior to supplementary treatments ..... 16
20.5 Removal of surface contamination from gold coatings ..... 16
21 Pretreatment of metals prior to powder coating ..... 16
21.1 Preparation of aluminium prior to powder coating ..... 16
21.2 Preparation of zinc and hot-dip-galvanized steel prior to powder coating ..... 16
21.3 Preparation of copper and brass prior to powder coating ..... 16
22 Cleaning and preparation processes ..... 16
22.1 Process A -- Organic-solvent degreasing and cleaning ..... 17
22.1.1 General ..... 17
22.1.2 Method A1 -- Hot solvent, not water-rinsable ..... 17
22.1.3 Method A2 -- Cold solvent, not water-rinsable ..... 17
22.1.4 Method A3 -- Hot solvent, water-rinsable ..... 17
22.1.5 Method A4 -- Cold solvent, water-rinsable ..... 18
22.1.6 Method A5 -- Petroleum fuel based mixtures containing emulsifying agents ..... 18
22.1.7 Method A6 -- Ultrasonic cleaning ..... 18
22.2 Process B -- Alkaline degreasing ..... 18
22.2.1 General ..... 18
22.2.2 Method B1 -- General-purpose alkaline degreasing ..... 18
22.2.3 Method B2 -- Mild alkaline degreasing ..... 18
22.2.4 Method B3 -- Cathodic alkaline degreasing ..... 19
22.3 Process C -- Acid emulsion cleaning ..... 19
22.4 Process D -- Abrasive cleaning ..... 19
22.4.1 General ..... 19
22.4.2 Method D1 -- Coarse-abrasive blasting ..... 19
22.4.3 Method D2 -- Fine-abrasive blasting ..... 19
22.4.4 Method D3 -- Scouring ..... 19
22.4.5 Method D4 -- Tumbling ..... 20
22.4.6 Method D5 -- Wire brushing ..... 20
22.5 Process E -- Caustic-alkali descaling ..... 20
22.6 Process F -- Acid pickling without electrolysis ..... 20
22.7 Process G -- Acid dipping ..... 20
22.8 Process H -- Anodic pickling ..... 20
22.8.1 General ..... 20
22.8.2 Method H1 ..... 20

22.9 Process J -- Acid de-rusting ....20
22.10 Process K -- Alkaline de-rusting ....21
22.11 Process L -- Chemical smoothing and electropolishing of steels ....21
22.12 Process M -- Passivation and removal of surface contamination from corrosion-resisting steels and surface preparation prior to electroplating ....21
22.13 Process N -- Acid pickling of aluminium alloys ....21
22.13.1 General ....21
22.13.2 Method N1 ....21
22.13.3 Method N2 ....21
22.13.4 Method N3 ....21
22.13.5 Method N4 ....22
22.13.6 Method N5 ....22
22.13.7 Method N6 ....22
22.14 Process O -- Oxide removal, i.e. "etching", treatment of aluminium and aluminium alloys 22
22.14.1 General ....22
22.14.2 Degreasing and cleaning ....22
22.14.3 Preparation prior to anodizing and adhesive bonding ....23
22.15 Process P -- Aluminium and aluminium alloys -- Removal of corrosion products, etching treatment, chemical polishing, electrobrightening and electropolishing ....24
22.15.1 Removal of corrosion products ....24
22.15.1.1 Method P1 -- Immersion ....24
22.15.1.2 Method P2 -- Swabbing ....24
22.15.2 Etching treatment ....24
22.15.2.1 Method P3 -- Etching by brushing or spray treatment ....24
22.15.2.2 Method P4 -- Etching and de-smutting treatment using sodium hydroxide ....24
22.15.3 Method P5 -- Chemical polishing ....25
22.15.4 Method P6 -- Electrobrightening ....25
22.15.5 Method P7 -- Electropolishing ....26
22.16 Process Q -- Cleaning of copper and copper alloys ....26
22.16.1 Method Q1 -- Cleaning in dichromate/sulfuric acid solution ....26
22.16.2 Method Q2 -- Cleaning in ferric sulfate/sulfuric acid solution ....26
22.17 Process R -- Acid descaling, etching, chemical smoothing and electropolishing of copper and copper alloys ....26
22.17.1 Method R1 -- Descaling dip ....26
22.17.2 Method R2 -- Bright dip ....26
22.17.3 Method R3 -- Chemical smoothing ....27
22.17.4 Method R4 -- Pickling in nitric acid ....27
22.17.5 Method R5 -- Electropolishing ....27
22.18 Process S -- Pickling of titanium and titanium alloys ....27
22.18.1 General ....27
22.18.2 Method S1 ....27
22.18.3 Method S2 ....27
22.19 Process T -- Pickling, chemical polishing and electropolishing of nickel and its alloys ....28
22.19.1 General ....28
22.19.2 Method T1 ....28
22.19.3 Method T2 ....28
22.19.4 Method T3 ....28
22.19.5 Method T4 -- Chemical polishing ....28
22.19.6 Method T5 -- Electropolishing ....29
22.20 Process U -- Preparation of tin alloy for electroplating ....29
22.21 Process V -- Removal of surface contamination from gold coatings ....29
22.22 Process W -- Preparation of aluminium alloys prior to electroplating ....29
22.23 Process X -- Preparation of nickel alloys prior to electroplating ....30
22.24 Process Y -- Preparation of titanium alloys prior to electroplating ....31
22.24.1 Method Y1 -- General method for titanium alloys ....31
22.24.2 Method Y2 -- Method for titanium and selected titanium alloys ....32
22.24.3 Method Y3 -- Chemical-etching method ....32
22.25 Process Z -- Preparation of zinc and zinc alloys prior to electroplating ....33
22.25.1 Method Z1 ....33
22.25.2 Method Z2 ....33

Annex A (informative) Maintenance of organic and vapour degreasing baths ....34

**Annex B (informative) The control of acidity in vapour cleaning baths ..... 35**

**Annex C (normative) Method for the determination of oxidizable material in sulfuric acid ..... 36**

**Annex D (informative) Method for determining free acidity ..... 37**

**Annex E (normative) Selection of method of cleaning according to the tensile strength of the steel in zinc-coated steel items prior to chromate conversion coating ..... 38**

**Annex F (normative) Method M4 ..... 40**

**Bibliography ..... 41**
