ISO/TR 29381:2008-10 (E)

Metallic materials - Measurement of mechanical properties by an instrumented indentation test - Indentation tensile properties

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and designations 2

5 Descriptions of the different methods 3
5.1 Method 1: Representative stress and strain 3
5.2 Method 2: Inverse analysis by FEA 10
5.3 Method 3: Neural networks 18

6 Summary 23

Annex A (informative) Measurement of residual stress by instrumented indentation test 25

Bibliography 29
