ISO 23830:2008-11 (E)

Surface chemical analysis - Secondary-ion mass spectrometry - Repeatability and constanc y of the relative-intensity scale in static secondary-ion mass spectrometry

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Symbols and abbreviations 1

3 Outline of method 2

4 Method for confirming the repeatability and constancy of the intensity scale 3
4.1 Obtaining the reference sample 3
4.2 Preparation for mounting the sample 3
4.3 Mounting the sample 4
4.4 Choosing the spectrometer settings for which intensity stability is to be determined 4
4.5 Operating the instrument 4
4.6 Measurements of the intensity and its repeatability 6
4.7 Calculating the intensity repeatability 7
4.8 Procedure for the regular determination of the constancy of the relative-intensity scale 9
4.9 Next calibration 10

Annex A (informative) Example of suitable operating conditions for static SIMS 11
