DIN 54402:2009-04 (E)

Testing of ion exchangers - Determination of the total capacity of anion exchangers

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Unit 4

5 Principle 4
5.1 General 4
5.2 Strongly basic exchangers and exchangers of mixed basic strength 5
5.2.1 General 5
5.2.2 Active strong base capacity 5
5.2.3 Strong base capacity 5
5.2.4 Weak base capacity 5
5.2.5 Total capacity 5
5.3 Weakly basic exchangers 6
5.3.1 General 6
5.3.2 Total capacity 6

6 Designation 6

7 Apparatus 6

8 Reagents 8

9 Sampling 8

10 Sample preparation (see flowcharts 1 and 2) 9
10.1 Strongly basic exchangers 9
10.2 Weakly basic exchangers 9

11 Volume adjustment 9

12 Determining the capacities of strongly basic exchangers (method A) 9
12.1 Determination of the active strong base capacity (flowchart 1) 9
12.2 Determination of the strong base capacity (see flowchart 1) 10
12.3 Determination of the weak base capacity (see flowchart 2) 11

13 Determination and evaluation of the weak base capacity of weakly basic anion exchangers (method B) (see flowchart 2) 13

14 Rapid method of determining the total capacity of strongly basic anion exchangers (method C) 15
14.1 Reagents 15
14.1.1 Sample preparation 15
14.1.2 Determining the total capacity 15
14.2 Apparatus 15
14.2.1 Sample preparation 15
14.2.2 Determining the total capacity 15

14.3 Apparatus settings 16
14.3.1 Sample preparation 16
14.3.2 Determining the total capacity 16
14.4 Procedure 16
14.4.1 Sample preparation 16
14.4.2 Determining the total capacity 17
14.5 Calculation of total capacity (KT) in mol/l exchanger 17

15 Test report 19
