

ISO 2081:2008-12 (E)

Metallic and other inorganic coatings - Electroplated coatings of zinc with supplementary treatments on iron or steel

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms, definitions, abbreviated terms and symbols	2
3.1	Terms and definitions	2
3.2	Abbreviated terms	2
3.3	Symbols	3
4	Information to be supplied by the purchaser to the electroplater	3
4.1	Essential information	3
4.2	Additional information	3
5	Designation	4
5.1	General	4
5.2	Designation specification	4
5.3	Designation of the basis material	5
5.4	Designation of heat treatment requirements	5
5.5	Examples	5
6	Requirements	6
6.1	Appearance	6
6.2	Thickness	6
6.3	Conversion coatings and other supplementary treatments	6
6.4	Adhesion of zinc and chromate coatings	7
6.5	Accelerated corrosion testing	7
6.6	Stress relief heat treatments before cleaning and metal deposition	9
6.7	Hydrogen-embrittlement-relief heat treatments after electroplating	9
7	Sampling	9
Annex A (normative)	Designation of chromate conversion coatings and other supplementary treatments	10
Annex B (normative)	Measurement of average thickness of coating on small articles	12
Annex C (informative)	Additional information on corrosion resistance, rinsing and drying, processing parts in bulk and dyeing of chromate conversion coatings	13
